QUALITY AND ENVIROMENTAL MANAGEMENT SYSTEM

The Ultraflex Quality System is certified CISQ-EQ Net by the Italian Shipping Registry (RINA), in conformity with the UNI EN ISO 9001 rule, certification N. 6669/02/S. The quality system involves all the company resources and processes starting from the design, in order to:

- assure product quality to the customer.
- set up the actions to maintain and improve the quality standards constantly.
- pursue a continuous process improvement to meet the market needs.
- maintain and verify conformity with ABYC requirements.

CORPORATE INFORMATION

Established in 1989 Uflex USA is a leader in steering and control systems for the marine industry. With full manufacturing capabilities in Sarasota, Florida, Uflex USA can support all sectors of the marine industry regardless of the volume and/or product requirements. And, as an affiliate of the Ultraflex Group, Uflex USA has tremendous resources to draw upon for new product development in hydraulics, electronics and many other technologies.

Innovative product design and unparalleled dedication to quality customer service and products continue to be the cornerstone of Uflex USA's growth. Today our products can be found as originally installed equipment on many of the most widely known and respected boat brands in the world. Aftermarket parts can be sourced from trained and experienced distributor network throughout North and South America.

Our dedication to providing the highest quality products and service is only matched by our commitment to developing new products employing the latest materials and technology to enhance our customer's boating experience. From steering wheels to sophisticated electronic controls, Uflex USA has everything you need to make sure that your boat looks and performs it's best for many, many years.

ULTRAFLEX electronic control components are EMC certificated and CE marked in conformity with CEI EN60945 and UNI-EN ISO 11547 standards

ULTRAFLEX mechanical steering systems components are all marked CE in compliance with the EEC Directive 94/25 and the rules EN29775 - EN28848.

ULTRAFLEX hydraulic steering systems components are all marked CE in compliance with the EEC Directive 94/25 and the rule ISO 10592.

The CE Examination on the ULTRAFLEX steering systems has been carried out by an Institute certified by the European Commission.

We kindly remind you that on the boats marked CE it is compulsory to install steering systems with components marked CE (see art. 4 and 5 of Directive 94/25/CE).

The descriptions and guidelines shown in this catalog should be used as general reference only. For any further information please contact our Technical Service.

UFLEX USA, INC., LIMITED WARRANTY

1. **Two Year Limited Warranty.** Uflex USA, Inc. warrants that all products manufactured by Uflex USA, Inc or Ultraflex S.p.A. and sold by Uflex USA to the retail purchaser ("Purchaser") that for two (2) years after the date of manufacture to be free from defects due to material or workmanship, subject to the exclusions below. Improper installation VOIDS this warranty. Installation should only be attempted by a trained and qualified technician.
2. **Exclusions.** This limited warranty does not cover and does not extend to any of the following:
(a) Failure caused by normal wear and tear, climatic conditions, misuse, neglect, lack of proper maintenance, accident, fire or other casualty damage, racing, overloading, negligence, modification, beaching or grounding of vessel, collision, impact, towing, acts of war or hostilities; (b) components not manufactured by Uflex USA, Inc., or its affiliates; (c) cost of removal or reinstallation of any component (including components manufactured by Uflex USA, Inc.), or disassembly and reassembly of the unit containing the component; (d) components not manufactured by Uflex USA, Inc. or Ultraflex S.p.A., whether or not warranted by the other manufacturer. (e) any product which has not been properly installed.
3. **Limitations.** THE REPAIR OR REPLACEMENT OF DEFECTIVE PARTS SHALL BE PURCHASER'S SOLE AND EXCLUSIVE REMEDY AND UFLEX USA, INC.'S SOLE AND EXCLUSIVE LIABILITY UNDER THIS WARRANTY. LABOR FOR REPLACEMENT IS NOT INCLUDED. Uflex USA, Inc.'s obligation under this warranty is limited to the repair or replacement (at Uflex USA, Inc.'s sole election) of any covered item found to be defective, when delivered by Purchaser pursuant to written authorization and instructions from Uflex USA, Inc., shipping prepaid to Uflex USA, Inc.'s, plant or other designated repair facility. Repaired or replaced items are warranted as provided herein for the unexpired portion of the applicable warranty period.
THIS WARRANTY, AND THE RIGHTS AND REMEDIES UNDER IT, IS EXCLUSIVE AND IS GIVEN IN PLACE OF ALL OTHER WARRANTIES, WHETHER EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE, WHETHER ARISING BY LAW, CUSTOM, CONDUCT OR USAGE OF TRADE. PURCHASER'S REMEDIES SHALL BE LIMITED AS STATED HEREIN AND UFLEX USA, INC. SHALL NOT BE LIABLE FOR ANY INCIDENTAL, CONSEQUENTIAL OR INDIRECT DAMAGES OR LOSSES RESULTING FROM DEFECTS.
THE RETAIL SELLER IS NOT A CO-WARRANTOR AND IS NOT AUTHORIZED BY UFLEX USA, INC. TO AMEND OR MODIFY THIS LIMITED WARRANTY IN ANY MANNER.
4. **Transferability of Warranty.** This limited warranty may not be transferred to subsequent purchasers.
5. **Miscellaneous.** Uflex USA, Inc. is an affiliate of Ultraflex S.p.A. Uflex, USA, Inc., reserves the right to make changes in the design and construction of its products at any time, without notice and without any obligation to incorporate such changes into products of prior manufacture. This limited warranty applies to new components sold by Uflex USA, Inc.. This limited warranty contains the entire agreement between Uflex USA, Inc. and Purchaser and supersedes all prior agreements, discussions, negotiations, commitments and representations, whether oral or written, between them regarding Uflex USA, Inc.'s warranty. If any provision of this limited warranty, or the application of it, is determined to be invalid or unenforceable for any reason, the remainder of this limited warranty and the application of it shall not be affected.
6. **Power A Mark II™.** The "Power A Mark II™ - User and Installation Manual" describes activities, operations, technical specifications which must be followed during the installation and/or usage of the product, in order to keep a valid warranty. Descriptions and drawings in that manual are suitable to allow installation and use of the product to skilled persons. In case of doubt and/or for any information, please contact our Technical Service.

All communications and notices from Purchaser regarding this limited warranty should be sent to:

UFLEX USA, INC.
6442 Parkland Drive
Sarasota, Florida 34243
(941) 351-2628.

RETURNS POLICY

Any product that is presumed defective should be reported to Uflex USA within 48 hours of receipt or discovery in the field. Upon notification Uflex USA will attempt to troubleshoot the problem with our customer over the phone. If we are unable to resolve the problem Uflex will issue a Return Goods Authorization number and we require that the product in question be returned to Uflex with all of its parts in its original packaging. The product should be returned freight prepaid to:

Uflex USA
RGA Department – RGA #
6442 Parkland Drive
Sarasota, Florida 34243

Upon receipt Uflex will examine the product to determine the cause of the defect. If the product is determined to have a defect in workmanship or material, it will be repaired or replaced at our discretion.

Our warranty does not cover labor, towing or other expenses. Further, it does not cover products that have been improperly installed, damaged in installation, misapplied, or misused.

Our products are not intended for use in racing applications.

The descriptions and guidelines shown in this catalog should be used as general reference only. For any further information please contact our Technical Service.

Power & Control

ELECTRONIC CONTROL SYSTEM

ELECTRONIC CONTROL SYSTEM

The easy to install PowerA Mark II™ control system provides fingertip operation of throttle and shift levers.

Using reliable and precise digital data transmission, this single or dual function control system is specifically designed to work on mechanically controlled as well as electronic and electro-hydraulic gas and diesel inboards, sterndrives and outboards.

8

The PowerA Mark II™ comes with many features including Dock Assist, which offers the operator the opportunity to reduce the sensitivity of the throttle function for easier dockside handling.

Other standard features include RPM Synchronization, which reduces engine vibration and improves fuel economy, a High Idle feature to increase RPM where higher idle is necessary for cold engine operations, a programmable Trolling Valve Control and neutral Warm Up.

The stylish and ergonomically designed control makes the PowerA Mark II™ suitable for many types of applications ranging from sport boats, yachts and commercial applications.

Available with and without trim, the control has audible and visual interfaces which alert the operator to the current status of the control system.

With the ability to control up to 2 engines from up to 4 different stations, the PowerA Mark II™ is a modular and flexible system with simple to install components.

The unique Control Unit Display of the PowerA Mark II™ provides simple touch pad programming with descriptive information regarding the set up, tuning and diagnostics of the system.

The Power A Mark II is a system that can replace mechanical controls either on fully mechanical engines, or on fully electronic engines, or on engines with the combination of both characteristics.

PRIVATE PROTOCOL CAN BUS FOR DATA TRANSMISSION

SUITABLE FOR MECHANICAL SHIFT AND THROTTLE AS WELL AS ELECTRONIC THROTTLE AND SHIFT

CONNECTION OF MULTIPLE STATIONS UP TO 4 CONTROLS

MODULAR SYSTEM

DIRECT COMMUNICATION WITH ELECTRONIC ENGINES (SAE J 1939 or NMEA 2000)

PLUG'N PLAY CONNECTIVITY

AUTOMATIC ENGINES SYNCHRONIZATION

DOCK ASSIST

FULLY PROGRAMMABLE SHIFT DELAYS

PERSONALIZED LABEL UPON REQUEST

CHROME FINISH CONTROL STATIONS:

Control without trim:

- Single engine - 42009 G
- Twin engines - 42011 T

Control with trim:

- Single engine - 42010 R
- Twin engines - 42012 V

IP protection: IP66

The "Power A Mark II™ - Installation and User Manual" describes activities, operations, technical specifications which must be followed during the installation and/or usage of the product, in order to keep a valid warranty and obtain the better performance. Description and drawings in that manual are suitable to allow an easy installation and safe use of the product by skilled personnel. In case of doubt and/or for any information, please contact our Technical Service.

PLEASE REFER TO LIMITED WARRANTY CONDITIONS REPORTED IN THIS CATALOG.

TECHNICAL FEATURES:

- Single Lever/Dual Function and Dual Lever/Dual Function for shift, throttle and trolling
- Up to 4 control stations
- Control boxes IP Protection: IP66
- Power supply: min 9 max 32V
- Working temperature: -25°C to +75°C
- Control station functions:
 - Station Select
 - Engines Warm up
 - High idle
 - Docking
 - Engine synchronization
 - Trolling valve, on request, according to customer's specifications
- Electronic throttle outputs:
 - Voltage (double output 0 - 5V and 0 - 2,5V)
 - PWM (0-100%, frequency from 200Hz to 1kHz)
 - Current (4 - 10mA)
- Digital Throttle Output:
 - SAE J 1939
 - NMEA 2000
- Trolling valve output
 - Voltage (0 - 5V)
 - PWM (0-100%, frequency from 100Hz to 1 kHz)
 - Current (4 - 20mA)
- Electric shift control:
 - 2 or 3 ON/OFF or proportional solenoids
 - Shift delays fully settable

The Power A Mark II™ electronic system actuators cannot be installed in those rooms where ignition-proof devices are required.

SAFETY DEVICES:

- Start in-gear PROTECTION(start inhibition with shifted gear)
- Audible and visual diagnostic failure alarm (READABLE MESSAGES ON THE CONTROL UNIT DISPLAY)
- Proportional shift delays
- Programmable working parameters
- Meets CEI EN 60945 standards

EMC CERTIFICATION AND CE MARK

Conforms with:

- CEI EN60945
- UNI-EN ISO 11547

COMPATIBILITY WITH ALL MECHANICAL THROTTLE ENGINES

COMPATIBILITY WITH ALL ELECTRONIC THROTTLE ENGINES

- Cummins, Detroit Diesel, Scania, Iveco, FPT, Lombardini, VM Motori, FNM, Yanmar, CMD-Volkswagen, Hyundai ecc.

Control Unit

PA2-CU - 42017 F
Control Unit: user interface for the configuration, settings and diagnostic of all the modules in a system.
IP protection: IP65
Dim.: 215 x 120 mm (8.5" x 4.7")

**V-Throttle
I-Throttle**

PA2-VT - 42018 H - for 0-5V interfaces (voltage)
PA2-IT - 42019 K - for 4-20 mA interfaces (current)
They supply the throttle electronic signal. Required for use with direct connection to electronic throttle on the engine.
IP protection: IP65
Dim.: 205 x 110 mm (8" x 4.3")

SAEJ-Throttle

PA2-SAEJT - Customized
It supplies the digital signals to CAN SAEJ 1939 or NMEA 2000 interfaces
IP protection: IP65
Dim.: 205 x 110 mm (8" x 4.7")

PWM-Throttle

PA2-PWMT - 42020 U
It supplies the electrical signals to PWM interfaces
IP protection: IP65
Dim.: 205 x 110 mm (8" x 4.3")

Shift Unit

PA2-SU - 42023 A
It controls up to 2 shifts with solenoids. Required for use with direct connection to the electrical shift unit on the transmission.
IP protection: IP65
Dim.: 210 x 120 mm (8.3" x 4.7")

E-Troll - Electronic or Electric

Control Unit for Trolling Valve both electronic (0-5V; 4-20mA) and electric (PWM) interface, designed according to customer's specifications. For controls with Trolling Valve please contact our Technical Service for custom configuration.

Power Unit

PA2-PU - 42026 G
Grants the power supply up to 4 modules with the input combination of up to 2 batteries, 12 and 24V. Required for all PowerA Mark II installations.
IP protection: IP65
Dim.: 205 x 110 mm (8" x 4.3")

M-Actuator

PA2-MA - 42027 J
The electromechanical actuators can control any mechanical interface (throttle shift or custom made trolling valve) through MACHZero and C8 mechanical cables.
IP protection: IP66
Length: 320 mm (12.6")

CHART A - E-Throttle Unit

MODEL	P. No.	DESCRIPTION	FEATURES	No. OF ENGINES	ENGINE TYPE
V-Throttle	42018H	Throttle with analog voltage interface	Redundant voltage input, IVS.	1 - 2	FPT, VolksWagen, Yanmar, Mer-cruiser, Lombardini.
I-Throttle	42019K	Throttle with current analog interface	Current outoputs.	1 - 2	4 - 20 mA throttle engines
PWM-Throttle	42020 U	Throttle with PWM interface	PWM outputs	1 - 2	Perkins, Caterpillar
SAEJ - Throttle	Custom	Throttle with SAEJ 1939 interface	CAN DeviceNet SAEJ 1939 outputs	1 - 2	SAEJ 1939 engines

**POWER A CONTROL**

- Single Engine with Trim – 42010 R
- Single Engine without Trim – 42009 G
- Dual Engine with Trim – 42012 R
- Dual Engine without Trim – 42011 T
 - Control station functions:
 - Station Select
 - Warm up
 - Docking
 - Engine synchronization
 - High idle
- Ergonomic design
- Adjustable friction
- Backlit control panel

MECHANICAL SHIFT AND THROTTLE M-ACTUATOR - 42027 J

- Electromechanical actuator for all mechanically controlled engine functions i.e. throttle or shift
- One actuator required per function per engine
- Connect to engines using 33C/Universal style mechanical control cables i.e. MachZero and C8
- IP 65 protected
- Dimensions: 4" x 12"

PROGRAMMING MODULE - 42017 F

- LCD Liquid crystal display
- Menu driven programming
- Diagnostic data
- IP 65
- Dimensions: 8" x 4.3"

**CABLES FOR MECHANICAL SHIFT AND THROTTLE ACTUATORS**

SELECTING A STEERING SYSTEM

Steering Torque →

Choosing the appropriate system for your application can sometimes be confusing because of the variety of steering systems available. There are 4 basic steering types: Mechanical Rotary, Mechanical Rack, Hydraulic and Power Steering that cover most of the styles of recreational powerboats. The Mechanical Rotary, Mechanical Rack and Pinion are available in standard or Zerotorque Feedback versions.

Selecting among these options is dependent upon the speed and handling characteristics of your particular boat. If your boat is an outboard or if it has a sterndrive without power steering, you need to consider steering systems that reduce the rudder torque feedback that you feel while driving your boat.

Feedback is the constant effort you have to put on the steering wheel just to go straight, and it is why it takes more effort to steer one direction than the other. The amount of feedback depends on the boat, the propeller and the steering system in the boat. Generally speaking, the faster you are going the more amount of effort you have to put on the steering wheel to keep the boat going straight.

PLANETARY GEAR DESIGN:

Uflex offers a rotary system featuring a "Planetary Gear Design" with 3 satellite gears which distributes steering feedback more evenly and effectively throughout the helm. The result is a reduction in the amount of effort needed to steer the boat straight or into the direction of the steering torque.

The Uflex Planetary Gear Design also spreads the wear of the steering direction changes over a wider wear area which reduces overall wear and the correspondent lost motion.

The competitively priced complete system from Uflex is called the Rotech. This package includes a helm, bezel and cable. It is a direct replacement for competing rotary systems requiring no new holes in the dash.

ROTECH

Single Contact Point

The Planetary Gear Design of the Rotech contrasts conventional systems which have only one contact point between two drive gears. The single contact point of conventional systems receives all the torque from the engine, which can eventually lead to uneven gear wear and correspondent lost motion in the steering.

ACCURA

For outboard boats, sterndrives without power assist or other applications with moderate torque loads it is recommended to upgrade to system with a clutch or gears which automatically lock out the steering torque while the system is not actively being turned.

Uflex offers the Accura system with the same Planetary Gear Design but in a ZeroTorque configuration, which does not require a constant effort on the steering wheel to keep the boat going straight or in the intended direction.

A special spring clutch holds the steering system on its intended course until the next change in the direction is initiated by the driver.

RACKTECH

Rack and Pinion steering systems are generally found on boats where space between the drivers knees and the steering helm is limited. Racks were particularly common in the early 70's on ski boats where the freeboard of the boats were very small.

Today's boats generally have enough space to fit a rotary helm, making the rack systems less popular as OEM installed option.

Rack and Pinion systems have the similar design issues as conventional rotary helms. Accordingly, all the steering loads are transmitted to one contact point and there is uneven wear in the system.

ACCUTECH

For boats that do have space constraints, Uflex offers the Racktech steering package that consists of a helm, bezel and steering cable. The ZeroTorque version of the Uflex rack and pinion is the Accutech, which features a spring clutch to allow for smooth transition in and out of the ZeroTorque mode.

Both systems come with the M86 Rack Cable which has an armor wrapped stranded wire core for high efficiency and smooth steering.

If you have a boat that has the space, it is recommended to take advantage of the Planetary Gear Designed rotary helms to reduce feedback and to improve longevity of the helm.

HYDRAULICS

Hydraulics are more and more popular on mid to high horsepower outboard applications. The increased application of hydraulics has a lot to do with the increase in horsepower over the years, and the added torque that is inherent with 4 stroke outboards compared to 2 strokes. The high output torque of the 4 strokes has changed the propellers resulting in higher torque loads on the steering systems. Hydraulic systems are very efficient in dealing with all torque conditions and often provide for fingertip steering effort.

Outboards systems are generally broken down into two systems; one for application below 150 hp and a different system for 150 and above.

GOTECH™

The most affordable hydraulic steering option in the market, the GoTech™ is the perfect solution for low horsepower, high torque four stroke outboards. Featuring a mid-mount composite helm and anodized aluminum front mount cylinder the GoTech™ offers smooth and easy steering with 4.5 turns lock to lock. It is an ideal system for pontoon boats, rigid hulled inflatables, walleye boats and any other application where mechanical steering is the not adequate for steering loads of today's outboards.

HYCO

Uflex offers the Hyco package which has a clever mounting system that allows you to install a front mount outboard cylinder without having to remove the engine. With the split tilt tube design of the Uflex Hyco, you can simply cut the old mechanical steering cable, insert the two tilt tube pieces independently and pin them to complete the hydraulic cylinder installation.

The cylinder is suspended in front of the engine and oil directed from the hydraulic helm moves the engine correspondent to the direction of the steering wheel.

PROTECH

Larger horsepower applications require a more robust steering cylinder. The Uflex Protech cylinder is designed for single, dual and triple engine applications up to 750 hp. Featuring heavy duty seals, 304 electropolished link assemblies, and a carbon steel piston, it is built for the most demanding applications.

SELECTING A STEERING SYSTEM

Uflex offers a simple application guide to assist in selecting the appropriate model cylinder according to the make and model of your engine at www.uflexusa.com. The Uflex helms are compatible with competing helms, hoses, cylinders and oil, so you can easily install a Uflex component regardless of what item you need to replace.

SILVERSTEER MASTERDRIVE

For especially high torque applications you may want to consider using a 1500 psi helm, which has relief valves set 500 Psi higher than the standard hydraulic helms which are rated to 1000 Psi. Bass, flats and other high horsepower boats with jackplates and shallow V deadrise experience extreme torque where the helm needs to have higher relief settings.

Uflex offers the Silversteer and Masterdrive helm and cylinder for these applications. With the same benefits as the Protech cylinder, the Silversteer cylinder also features a keyed bullhorn design that maximizes the rigidity of the cylinder when dealing with peak torque loads.

Large inboard boats with displacement hulls can generate high torque loads. Uflex offers a wide variety of hydraulic helms and cylinders that can be paired together to provide optimal steering for your application.

EFFICIENCY COMPARISON TESTS

Test configuration:

3 bends at 90°; 1000N load

NOTE: indicated figures have been obtained after 500 cycles of running from samples bought from after-market sources

USE AND MAINTENANCE

The steering cable must be installed avoiding excessive and/or tight bends. This will provide the driver with easy handling at all speeds, helping to reduce system inefficiency, and excess play in the system.

Marine corrosion may cause the materials to deteriorate affecting maneuvering efficiency and in the worst case, system failure. By following the engine manufacturer specifications, the steering cable end fittings and the engine cable support must be cleaned and greased periodically; these simple operations minimize wear and corrosion in the system.

The steering cable must be regularly inspected. If steering becomes hard, inconsistent, cuts on the conduit surface are noticed, or any other component found damaged, the cable must be replaced immediately.

When storing your boat for an extended period of time we recommend removing the steering cable end fitting from its engine side support and cleaning it adequately.

SELECTION OF STEERING SYSTEM AND CABLE LENGTH MEASUREMENT

APPLICATION	BOAT LENGTH	STEERING SYSTEM	Ultraflex hydraulic steering systems are recommended for boats that exceed 50 mph. Always follow engine manufacturer's instructions.
 OUTBOARD	 up to 30' (9m)	T71FC - T81FC T73NRFC - T83NRFC T91 - T93ZT T101 - T103ZT G86 - G88NR G96 - G98NR	
		twin cable rotary steering systems	
 INBOARD	 up to 35' (10.5m)	T71FC - T81FC T73NRFC - T83NRFC T91 - T93ZT T101 - T103ZT G86 - G88NR G96 - G98NR	
		twin cable rotary steering systems	
 STERNDRIVE POWER ASSISTED		T91 - T101 T71FC - T81FC G86 - G96	
		twin cable rotary steering systems	

NOTE: sterndrive engines not equipped with power steering can create very high steering loads. Our hydraulic steering systems are recommended for these type of boats. For any further information please contact our Technical Service Department.

- Speed, hull, horsepower, engine type, displacement and size are major factors in boat performance and handling characteristics. The above selection guide should be used as a general reference only.
- One of the major factors in selecting a steering system is proper cable length. Due to specific routing in each boat, these approximate lengths will vary. Final selection should be made with the assistance of a qualified technician.
- Ultraflex mechanical steering systems should not be used on boats equipped with engines that exceed the maximum horsepower rating of the boat.

HOW TO MEASURE FOR NEW STEERING CABLE INSTALLATION

Add the lengths of A + B + C together and subtract 4" (10 cm) for each 90° bend.
Add 12" (30,5 cm) for the engine tilt tube.
To order in foot length, round up to the nearest whole foot.

Fig. 1

TILT TUBE MOUNTING - Fig. 1

Example:
 $A (2.5') + B (10.5') + C (3') = 16'$
 $16' - 8''$ (two 90° bends) = $15'4''$
 $15'4'' + 12''$ (tilt tube) = $16'4''$
 Round up to 17'

Fig. 2

TRANSOM SUPPORT OR SPLASHWELL MOUNTING - Fig. 2-3

Example:
 $A (2.5') + B (10.5') + C (3') = 16'$
 $16' - 8''$ (two 90° bends) = $15'4''$
 Round up to 16'

T71FC AND T72FC ROTARY STEERING SYSTEMS

FEATURING PLANETARY GEAR DESIGN

A COMPLETE STEERING SYSTEM CONSISTS OF:

- Steering helm:
 - T71FC - 38867 H - single cable steering helm
 - T72FC - 38868 K - dual cable steering helm
- Mounting bezel:
 - X34 - 36654 B - black, 90° mounting
 - X34W - 40654 C - white, 90° mounting
 - X35 - 36655 C - black, 20° mounting
- Steering cable: **M66**
NOTE: two M66 are needed with the T72FC system
- Optional steering wheel (see index)
- Engine connection kits (see index)

FEATURES AND TECHNICAL SPECIFICATIONS

- Fast connect, simple installation
- All stainless steel cable output ends
- Corrosion resistant materials
- Particularity suitable where clearance is limited
- Optional 90° or 20° installation
- Standard 3/4" tapered shaft
- Lock-to-lock steering wheel turns: approx. 3.8
- Stroke: 9" (228 mm)
- Maximum allowable steering wheel diameter: 16" (406 mm)
- Minimum steering cable bend radius: 7.9" (200 mm)
- Minimal feedback
- Compact for mounting
- T71FC and T72FC steering systems are not to be used on boats equipped with engines that exceed the maximum horsepower rating of the boat
- For boats faster than 50 mph our hydraulic steering systems are recommended
- T71FC steering system is also available in package with ROTECH, which includes the X35 bezel and M66 cable.
- Exceeds EN 28848 safety standards
- Exceeds ABYC P17 safety standards

T73NRFC

ANTI-FEEDBACK

STEERING SYSTEM

**FEATURING
PLANETARY GEAR
DESIGN**

A COMPLETE STEERING SYSTEM CONSISTS OF:

- Steering helm:
T73NRFC - 38869 M
anti-feedback single cable steering helm
- Mounting bezel:
X34 - 36654 B - black, 90° mounting
X34W - 40654 C - white, 90° mounting
X35 - 36655 C - black, 20° mounting
- Steering cable: **M66**
- Optional steering wheel (see index)
- Engine connection kits (see index)

FEATURES AND TECHNICAL SPECIFICATIONS

- Easy and safe steering : a **patented non-reversible mechanism** eliminates the continuous load on the operator caused by the propeller torque
- Fast connect, simple installation
- Compact rotary helm unit: the central location of the steering shaft makes these systems the most compact in their class
- Most suitable where clearance is limited
- Ideal for outboards and surfacing propellers
- Optional 90° or 20° installation
- Standard 3/4" tapered shaft
- All stainless steel cable output ends
- Made exclusively in corrosion resistant materials
- Lock-to-lock steering wheel turns: approx 3.8
- Stroke: 9" (228 mm)
- Maximum allowable steering wheel diameter: 16" (406 mm)
- Minimum steering cable bend radius: 7.9" (200 mm)
- T73NRFC steering system is not to be used on boats equipped with engines that exceed the maximum horsepower rating of the boat
- Available in package including the X34 bezel and M66 cable with ACCURA
- Exceeds EN 28848 safety standards
- Exceeds ABYC P17 safety standards

T81FC - T82FC T83NRFC (ANTI-FEEDBACK) TILT STEERING SYSTEMS

**FEATURING
PLANETARY GEAR
DESIGN**

A COMPLETE STEERING SYSTEM CONSISTS OF:

- Steering helm:
 - T81FC** - 38957 J
single cable steering helm
 - T82FC** - 38958 L
dual cable steering helm
 - T83NRFC** - 38959 N
anti-feedback single cable steering helm
- Tilt mechanism:
 - X52** - 39250 U

NOTE: X52 tilt mechanism fits Uflex tilt mount rotary and rack and pinion steering helms as well as Ultraflex tilt mount hydraulic pumps except SilverSteer™ and MasterDrive™ steering systems
- Steering cable: **M66**
NOTE: two M66 are needed with the T82FC system
- Optional steering wheel (see index)
- Engine connection kits (see index)

FEATURES AND TECHNICAL SPECIFICATIONS

- Tilt range of 48° and five locking positions
- Fast connect, simple installation
- Tilt device eliminates underdash movement
- Standard 3/4" tapered shaft - stainless steel
- All stainless steel cable output ends
- Corrosion resistant materials
- Lock-to-lock steering wheel turns: approx. 3.8
- Stroke: 9" (228 mm)
- Maximum allowable steering wheel diameter: 16" (406 mm)
- Minimum steering cable bend radius: 7.9" (200 mm)
- T81FC, T82FC and T83NRFC steering systems are not to be used on boats equipped with engines that exceed the maximum horsepower rating of the boat
- For boats faster than 50 mph our hydraulic steering systems are recommended
- Exceeds EN 28848 safety standards
- Exceeds ABYC P17 safety standards

T91 AND T93ZT (ZERO TORQUE) ROTARY STEERING SYSTEMS

FEATURING PLANETARY GEAR DESIGN

A COMPLETE STEERING SYSTEM CONSISTS OF:

- Steering helm:
 - T91 - 42647 S - single cable steering helm
 - T93ZT - 42648 U - zero torque single cable steering helm
- Mounting bezel:
 - X34 - 36654 B - black, 90° mounting
 - X34W - 40654 C - white, 90° mounting
 - X35 - 36655 C - black, 20° mounting
 - X91 - 42850 N - chrome plated, 90° mounting
- Steering cable: **M90 Mach** (patented)
ATTENTION: M90 Mach steering cable is suitable for use also with T71FC, T72FC, T73NRFC, T81FC, T82FC, T83NRFC Ultraflex steering helms. M66 steering cable is not fit for T91, T93Zt, T101, T103ZT steering systems.
- Optional steering wheel (see index)
- Engine connection kits (see index)

FEATURES AND TECHNICAL SPECIFICATIONS:

- Specifically designed for high performance and high efficiency applications
- M90 mach cable (patented) performance and durability increased by top quality materials and construction.
- Fast connect, simple installation, patented end fitting
- Stainless steel cable output end featuring patented gasket, engine side
- Corrosion resistant materials
- Particularly suitable where clearance is limited
- Optional 90° or 20° installation
- Standard 3/4" tapered shaft
- Lock-to-lock steering wheel turns: approx. 4,2
- Stroke: 228 mm (9")
- Maximum allowable steering wheel diameter: 406 mm (16")
- Minimum steering cable bend radius: 200 mm (7.9")
- Minimal feedback
- Compact for mounting
- T91 and T93ZT steering systems are not to be used on boats equipped with engines that exceed the maximum horsepower rating of the boat
- For boats faster than 50 mph our hydraulic steering systems are recommended
- Exceeds EN 28848 safety standards
- Exceeds ABYC P17 safety standards

G86 AND G88NR (ANTI-FEEDBACK) RACK AND PINION STEERING SYSTEMS

A COMPLETE STEERING SYSTEM CONSISTS OF:

- Preassembled rack and steering cable: **M86**
- Helm assembly:
 - G86** - 39418 G standard
 - G88NR®** - 39419 J - anti-feedback
- Mounting bezel:
 - X34** - 36654 B - black, 90° mounting
 - X34W** - 40654 C - white, 90° mounting
 - X35** - 36655 C - black, 20° mounting
- Optional steering wheel (see index)
- Engine connection kits (see index)

FEATURES AND TECHNICAL SPECIFICATIONS

- Easy and safe steering: patented anti-feedback G88NR helm eliminates the continuous load on the operator caused by the propeller torque
- All stainless steel cable output ends
- Made exclusively in corrosion resistant materials
- Optional 90° or 20° installation
- Standard 3/4" tapered shaft
- Lock-to-lock steering wheel turns: 3.5
- Stroke: 8.2" (210 mm)
- Maximum allowable steering wheel diameter: 16.5" (420 mm)
- Minimum steering cable bend radius: 7.9" (200 mm)
- G86 and G88 NR steering systems are not to be used on boats equipped with engines that exceed the maximum horsepower rating of the boat
- Available in package includes X34 bezel and M66 cable with RACKTECH and ACCUTECH
- Exceeds EN 28848 safety standards
- Exceeds ABYC P17 safety standards

G96 AND G98NR (ANTI-FEEDBACK) RACK AND PINION TILT STEERING SYSTEMS

A COMPLETE STEERING SYSTEM CONSISTS OF:

- Preassembled rack and steering cable: **M86**
 - Helm assembly:
 - G96** - 39650 L standard
 - G98NR®** - 39649 C anti-feedback
 - Tilt mechanism:
 - X52** - 39250 U
- NOTE:** X52 tilt mechanism fits Ultraflex tilt mount rotary and rack and pinion steering helms as well as Ultraflex tilt mount hydraulic pumps except SilverSteer™ and MasterDrive™ steering systems
- Optional steering wheel (see index)
 - Engine connection kits (see index)

FEATURES AND TECHNICAL SPECIFICATIONS

- Easy and safe steering: the patented anti-feedback G98NR helm eliminates the continuous load on the operator caused by the propeller torque
- Fast, simple installation
- Tilt range of 48° and five locking positions
- Tilt device eliminates underdash movement
- Standard 3/4" tapered shaft - stainless steel
- All stainless steel cable output ends
- Made exclusively in corrosion resistant materials
- Lock-to-lock steering wheel turns: 3.5
- Stroke: 8.2" (210 mm)
- Maximum allowable steering wheel diameter: 16.5" (420 mm)
- Minimum steering cable bend radius: 7.9" (200 mm)
- G96 and G98NR® steering systems are not to be used on boats equipped with engines that exceed the maximum horsepower rating of the boat
- Exceeds EN 28848 safety standards
- Exceeds ABYC P17 safety standards

90° rudder support, corrosion resistant

OMC® TT - 39363 H

Thru transom sterndrive steering kit applicable for OMC® sterndrives manufactured from 1968-1982. Connects standard mechanical steering cable to the transom and sterndrive.

S39T - 53930 J

Aluminum steel tube only for S39

S40T - 53935 O

Aluminum steel tube only for S40

Steering cable supports with stainless steel tube also available:

S39SS - 41551 X

S39TSS - 72971 W Stainless steel tube for S39SS

S40SS - 41552 Z

S40TSS - 72972 Y Stainless steel tube for S40SS

S55SS - 41553 B

S38

S39

S40

S55

OMC-TT

ENGINE CONNECTION KITS

A73SS - 41255 T

Stainless steel tiller arm for some Mercury® engines

A74SS - 41256 V

Stainless steel tiller arm for some Johnson®, Evinrude®, BRP® engines

A75 - 34459 X Clevis

A73SS/A74SS STAINLESS STEEL

A75

WARNING: A73SS and A74SS tiller arms are recommended for mechanical steering systems only

STEERING CABLE ADAPTORS

K46 - 35679 L

Adaptor to connect M47 steering cables (discontinued) to Morse® D290 and Ultraflex® FC type steering helms

K66 - 38432 Q

Adaptor to connect M66 steering cables to Ultraflex® threaded steering helms (discontinued)

1503

Adapts GEM®, EDSON® wheels to the Uflex steering shaft

K46

K66

1503

WIRE TYPE STEERING GROMMETS AND RINGS

PACKAGED ROTARY STEERING SYSTEMS

UFLEX ROTARY STEERING SYSTEMS PACKAGED IN A BOX

A convenient kit form, especially suitable as replacement steering, that includes helm, bezel and cable.

The cable is available in 1-ft increments from 6 to 20 feet (specify cable length when ordering)

The wheel is not included

ROTECH™ STEERING SYSTEM

ROTECH -XLL - LL= Length
T71FC - helm
X34 - 90° bezel
M66 - steering cable

ROTECH - II XLL - LL= Length
T72FC - helm-dual
X34 - 90° bezel
M66 - 2 steering cables

Featuring the T71FC helm with a Planetary Gear Design, the Rotech reduces steering effort and delivers more balanced loads on the steering wheel. This unique design also offers a wider wear area which reduces lost motion and improves durability. Centered on the main drive shaft, this helm requires less room behind the dash and is a direct "drop in" replacement for competing system; requiring no new holes for installation. The Rotech package also includes the M66 Universal Rotary Steering Cable with stainless steel output fittings for maximum longevity and smooth steering.

ACCURA™ STEERING SYSTEM

ACCURA - XLL - LL= Length
T73NR FC - anti-feedback helm
X34 - 90° bezel
M66 - steering cable

With a patented spring clutch the Accura eliminates continuous loads on the steering wheel while the direction of the boat is not being actively changed, which is highly recommended for outboard and stern-drives without power assist.

The T73NRFC anti-feedback helm included with the Accura package also features a Planetary Gear Design for smooth and more balanced steering effort. A direct drop in replacement for competing systems, the Accura also comes with the M66 Universal Rotary Steering Cable with stainless steel output fittings for maximum longevity and smooth steering.

PACKAGED RACK AND PINION STEERING SYSTEMS

UFLEX RACK AND PINION STEERING SYSTEMS PACKAGED IN A BOX

A convenient kit form, especially suitable as replacement steering, that includes helm, bezel and cable.

The cable is available in 1-ft increments from 6 to 30 feet (specify cable length when ordering)

The wheel is not included

RACKTECH™ STEERING SYSTEM

- RACKTECH XLL** - LL= Length
M86 - preassembled rack and steering cable
G86 - helm assembly
X34 - 90° bezel

The Racktech Rack and Pinion steering package offers a compact installation and features the M86 cable with an armor wrapped stainless steel core for maximum efficiency and minimal lost motion.

Ideal for boats with minimal clearance behind the dash, the Racktech is recommended for power assisted sterndrives and other applications with minimal rudder torque.

ACCUTECH™ STEERING SYSTEM

- ACCUTECH XLL** - LL= Length
M86 - preassembled rack and steering cable
G88NR® - anti-feedback helm assembly
X34 - 90° bezel

Recommended for outboard applications or non power assisted sterndrives where there is limited space behind the dash, the Accutech features a patented spring clutch of the G88NR helm eliminates continuous loads while not actively changing direction.

The M86 cable included with the Accutech has an armor wrapped stainless steel core for maximum efficiency and minimal lost motion.

HYDRAULIC OUTBOARD STEERING SYSTEMS

35

HYDRAULIC AND ELECTRO-HYDRAULIC STEERING SYSTEMS

ULTRAFLEX HYDRAULIC STEERING SYSTEMS

All the components of Ultraflex hydraulic steering systems are made specifically for the marine environment, using materials and working process which offer long life and safety for the most extreme conditions.

HOW THE SYSTEM WORKS

A manual hydraulic steering system consists of a helm, which pumps hydraulic fluid through two hoses to a hydraulic cylinder which is mounted to an engine or rudder.

While steering, hydraulic oil is pushed through hoses into two chambers within the hydraulic cylinder. Depending upon which direction you steer, one of the two chambers is filled or relieved of oil, thereby changing the course of the boat.

While not actively steering, the torque (hydraulic pressure in the hoses) is held by a one way valve in the helm, which eliminates the transmission of the torque "feedback" to the steering wheel.

The number of turns from full lock-to-lock has a relationship to ease of steering. Generally speaking, the more number of turns lock-to-lock the easier the boat will be to steer and vice versa.

Because of the variety of applications and handling characteristics of boats, the number of turns lock to lock is often a matter of personal preference. As a general rule, the first priority should be ease of steering, then number of turns lock to lock. However, it is not recommended to have fewer than 4 turns lock to lock on high performance boats.

To calculate number of turns lock to lock simply divide the cubic inch displacement of the cylinder by the cubic inch displacement of the helm.

Other factors that can significantly affect the amount of effort to steer the system can be:

- Fittings introduced between the helm and cylinder that restrict fluid efficiency
- Oil viscosity
- Type of hose and inside hose diameter.
- Vessel speed
- Trim angle
- Rudder dimension, or engine power
- Propeller selection
- Hull type (displacement, planing, etc.)
- Sea conditions

SINGLE STATION / SINGLE CYLINDER:

PACKAGED OUTBOARD STEERING SYSTEM FOR SINGLE ENGINE UP TO 115 HP

GOTECH™ WHEEL TURNS 4,5 - 42634 G

For outboard single engine up to 115 hp

GOTECH™ package kit contains:

- UP18** Intermediate mount helm pump
- UC81-OBF** Front mount outboard cylinder
- OL 150** Hydraulic oil – 2 litres.
- KIT OB-GT-60** Hose kit dia. 1/4" 6 m (19.7") length

The wheel is not included.

GOTECH™ - 42634 G

UP18 - HELM PUMP

- Built-in lock valve for positive rudder lock
- Integral relief valve for over-pressure protection
- 3/4" tapered anodized aluminum shaft
- Corrosion proof composite housing
- Easy accessible lock valve and shaft seal for replacement
- For use with UC81-OBF cylinder only
- Intermediate dashboard position mount

PACKAGED OUTBOARD STEERING SYSTEM UP TO 115HP

UP20 F - UP20 T HELM PUMPS

FEATURES

- Built-in lock valve for positive rudder lock
 - Integral relief valve for over-pressure protection
 - 3/4" tapered anodized aluminum shaft
 - Corrosion proof composite housing
 - Easy accessible lock valve and shaft seal for replacement
 - Includes 90° **adjustable** fittings for 3/8" tube
 - For use with UC94-OBF cylinder only
 - Tilt mechanism **X52** - 39250 U for UP20 T pump
- Tilt range of 48° and five locking positions

NOTE: X52 tilt mechanism fits standard Ultraflex tilt mount rotary and rack and pinion steering helms as well as standard Ultraflex tilt mount hydraulic pumps except SilverSteer™ and MasterDrive™ steering systems

- **X56** - 40198 C square flange permits to install the UP20F pump in an intermediate dashboard position

**UC94-OBF
FRONT MOUNT
CYLINDER FOR
OUTBOARD
ENGINES
UP TO 150 HP
TOTAL**

UC94-OBF - Balanced: the number of turns lock-to-lock is equal port to starboard or vice-versa

**Adjustable boss style fittings for easy installation
High resistance stainless steel connection bolt (ULTRABOLT)**

Intended for single engine applications of 150 HP and under, the UC94 cylinder is compatible with competing helms, hoses and oil, and is built to last with heavy duty stainless steel cylinder rod, seals and link assemblies. Constructed of top grade materials this cylinder is simple to install and fits almost every two and four stroke outboard engine in the market.

See the application guide next page to ensure compatibility with your engine.

The UC94 is recommended for use with the UP20 series helm and pre-made hose kits (Kit OB and Kit OB-BHBR).

INNOVATIVE DESIGN (PATENTED):

Split and pinned mounting rod for easy installation and bushings to prevent friction with engine tilt tube.

Depending on the applications on the outboard engines, the UC94-OBF cylinder is available in 2 versions:

SPECIFICATIONS	UC94-OBF/1 -/3
Volume	94 cc - 5.7 cu. in
Output force	278 kg - 613 lbs
Inside diameter	30 mm - 1.18"
Stroke	186 mm - 7.3"
3/8" (9.5mm) Fittings	For high pressure flex hose

For twin engine applications, the minimum distance between the two engine centers is 21.6" (550 mm)

UC94-OBF
CYLINDER
APPLICATIONS

WARNING

The UC94-OBF front mount cylinder is recommended for use with outboard engines 150 hp total and less and where the boat speed does not exceed 55 mph (48 knots)

Not intended for use in racing applications.

WARNING

These recommendations should be used as a general reference only. For any further information please contact our Technical Service.

UC128-OBF FRONT MOUNT CYLINDER

UC128-OBF - Balanced: the number of turns lock-to-lock is equal port to starboard or vice-versa

Adjustable boss style fittings for easy and leak free installation High resistance stainless steel connection bolt (ULTRABOLT)

Compatible with competing helms, hoses and oil, the UC128 cylinder is built to last with heavy duty stainless steel cylinder rod, seals and link assemblies. Constructed of top grade materials this cylinder is simple to install and fits almost every two and four stroke outboard engine in the market.

See the application guide next page to choose the appropriate cylinder (UC128-OBF/1, UC128-OBF/2 or UC128-OBF/3) for your application. The UC128 cylinders are recommended for use with UP25, UP28, UP33 and UP39 series helms and preassembled hoses (Kit OB and Kit OB-BHBR).

Depending on the applications on the outboard engines, the UC128-OBF is available in 3 versions:

UC128-OBF/1 39423 Z

UC128-OBF/2 39966 R

UC128-OBF/3 39967 T

In the applications with dual UC128-OBF cylinder it is necessary to order a standard UC128-OBF cylinder (link arm attached to the starboard side of the cylinder) and a port UC128P-OBF cylinder (link arm attached to the port side of the cylinder). See appropriate section for A90 tie bar required for use on dual engine/dual cylinder applications.

Depending on the applications on the outboard engines, the UC128P-OBF port cylinder is available in 2 versions:

UC128P-OBF

UC128P-OBF/1 40106 U

UC128P-OBF/2 40107 W

UC128-OBF DIMENSIONS

544 mm - 21.43"

WARNING

These recommendations should be used as a general reference only. Final selection should be made with the assistance of a qualified installation technician.

For any further information please contact our Technical Service.

For higher horsepower applications, high performance SilverSteer™ cylinder is recommended.

**UC128-OBF
CYLINDER**

ORDER GUIDE:

SYSTEM	APPLICATION	WHEEL TURNS	COMPONENTS	MODEL	QTY
Single engine Single cylinder 	Up to 300 hp max	4.8 (UP25)	Cylinder	UC128-OBF	1
			Helm pump	UP25 or UP28	1
			Hose Kit	KIT OB	1
		4,3 (UP28)	Oil	OIL 15	2
			Steering wheel	(Wheel selection)	1

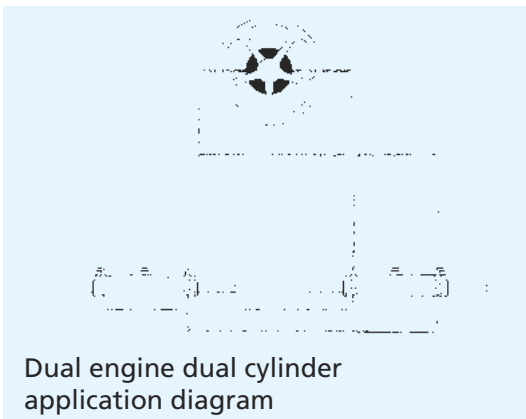

For a second station add:
1 UP25 or UP28 helm pump, 1 KIT OB-2S fitting kit, 1 KIT OB, 1 OIL 15, 1 steering wheel

Dual engine Single cylinder 	Up to 300 hp max (non-counter rotating engine)	4.8 (UP25)	Cylinder	UC128-OBF	1
			Helm pump	UP25 or UP28	1
			Hose Kit	KIT OB	1
	Up to 500 hp max (counter rotating engine)	4,3 (UP28)	Oil	OIL 15	2
			Tie bar	A94	1
			Steering wheel	(Wheel selection)	1

For a second station add:
1 UP25 or UP28 helm pump, 1 KIT OB-2S fitting kit, 1 KIT OB, 1 OIL 15, 1 steering wheel

Dual engine Dual cylinder 	Up to 500 hp max (non-counter rotating engines)	6.1 (UP39)	Cylinder	UC128-OBF	1
			Cylinder Port	UC128P-OBF	1
			Helm pump	UP39 or UP45	1
			Hose Kit	KIT OB	1
	Up to 600 hp max (counter rotating engines)	5.3 (UP45)	Oil	OIL 15	3
			Tie bar	A90	1
			Steering wheel	(Wheel selection)	1
			Connection Kit	KIT OB-DBR	1

For a second station add:
1 UP39 or UP45 helm pump, 1 KIT OB-2S fitting kit, 1 KIT OB, 2 T fittings 39502 V, 1 OIL 15, 1 steering wheel

WARNING

These steering systems can only be used when the engine is in compliance with the approved U.S. Coast Guard vessel horsepower rating. When installing UC128-OBF cylinder in conjunction with an **ENGINE JACK PLATE** trim system, a manual clearance check must be made in all moveable positions. Failure to comply with the installation manual for engine application, cylinder/hose clearance, and approved hydraulic fluids, may result in loss of steering, causing serious property damage and / or personal injury.

NOTE:
Three outboard engine applications are available with UC128-SVS cylinder. For any further and detailed information, please contact our Technical Service.

For triple outboard engines, dual cylinder applications, please refer to tie-bar section.

UC132-OBS SIDE MOUNT CYLINDER

WARNING

The UC132-OBS is not intended for use with 1500 psi UP-SVS Series helms.

UC132-OBS

Unbalanced: the number of turns lock-to-lock is not equal port to starboard and vice-versa

SPECIFICATIONS	UC132-OBS - 39430 W
Volume	132 / 163 cc - 8 / 9.95 cu. in
Output force	464 / 574 kg - 1023 / 1265 lbs
Inside diameter	32 mm - 1.25"
Stroke	203 mm - 8"
3/8" (9,5 mm) fittings	For high pressure flex hose

UC132-OBS side mount cylinder features a turning nut for fast and easy installation to the engine tube (PATENTED)

Clearance required at the engine tube side: 375 mm (14.76")

ORDER GUIDE:

SYSTEM	APPLICATION	WHEEL TURNS	COMPONENTS	MODEL	QTY
Single engine Single cylinder 	Up to 300 hp max	5.3/6.5 (UP25)	Cylinder	UC132-OBS	1
			Helm pump	UP25 or UP28	1
			Hose Kit	KIT OB	1
		4.7/5.8 (UP28)	Oil	OIL 15	2
			Steering wheel	(Wheel selection)	1
For a second station add: 1 UP25 or UP28 helm pump, 1 KIT OB-2S fitting kit, 1 KIT OB, 1 OIL 15, 1 steering wheel					

WARNING:

the UC132-OBS side mount cylinder is not recommended for use in installations where the boat speed exceeds **51.5 mph (45 knots)** and the power exceeds max Coast Guard recommendation for the boat.

Not intended for use in racing applications.

Dual engine Single cylinder 	Up to 300 hp max (non-counter rotating engine)	5.3/6.5 (UP25)	Cylinder	UC132-OBS	1
			Helm pump	UP25 or UP28	1
			Hose Kit	KIT OB	1
	Up to 450 hp max (counter rotating engine)	4.7/5.8 (UP28)	Oil	OIL 15	2
			Tie bar	A94	1
			Steering wheel	(Wheel selection)	1
For a second station add: 1 UP25 or UP28 helm pump, 1 KIT OB-2S fitting kit, 1 KIT OB, 1 OIL 15, 1 steering wheel					

	Up to 500 hp max (non-counter rotating engines)	6.7/8.3 (UP39)	Cylinder	UC132-OBS	2
			Helm pump	UP39 or UP45	1
			Hose Kit	KIT OB	1
			Oil	OIL 15	3
	Up to 600 hp max (counter rotating engines)	5.8/7.3 (UP45)	Tie bar	A90	1
			Steering wheel	(Wheel selection)	1
			Connection Kit	KIT OB-DBR	1

WARNING: THIS APPLICATION REQUIRES THAT THE THREADS ON THE TILT TUBE EXTEND AT LEAST 0.6" (15 mm) FROM BOTH SIDES.

HIGH PRESSURE FLEXIBLE HOSES

KIT OB: HYDRAULIC HOSE KIT

Two high pressure flexible hoses with pre-crimped brass fittings and bend restrictors on both ends. Recommended for use with all Ultraflex helms with 1000 psi relief valves.

KIT OB

KIT OB-BHBR: HYDRAULIC HOSE KIT

Two high pressure flexible hoses with pre-crimped brass fittings, bulkhead fittings and bend restrictors on both ends. Recommended for use with all Ultraflex helms with 1000 psi relief valves.

KIT OB-DBR : DUAL CYLINDER/ DUAL ENGINE CONNECTION KIT

Two high pressure flexible hoses, with pre-crimped fittings and bend restrictors on both ends. Not recommended for use with SilverSteer™ Series cylinders.

Three lengths available: 2', 3', 4'

KIT OB-DBR	LENGTH
KIT OB-DBR-02	2'
KIT OB-DBR-03	3'
KIT OB-DBR-04	4'

KIT OB-DBR

KIT OB-2S: FITTINGS FOR A SECOND STEERING STATION OR AUTOPILOT INSTALLATION

It includes all necessary fittings and 7,6 m (25 ft) of 3/8" dia. nylon tube for the compensating line

KIT OB-2S - 39539 V

KIT OB-2S

STANDARD OUTBOARD HYDRAULIC STEERING SYSTEMS PACKAGED IN A BOX

HYCO-1 WHEEL TURNS 4.7

For outboard engines up to 150 hp

HYCO package kit contains:

- UP20 F** Front mount helm pump.
- UC94-OBF** Front mount outboard cylinder
Specify engine type when ordering.
- OIL 15** Hydraulic oil - 2 quarts.
- KIT OB OPTIONAL** Hose kit with preassembled fittings
Specify length required when ordering

The wheel is not included.

WARNING: Depending on the applications, the UC94-OBF is available in 2 versions: UC94-OBF/1 and UC94-OBF/3. UC94-OBF/1 cylinder is not suitable for HONDA® BF115 and BF130 engines and Mercury® Optimax™ 75, 90, 115. For these engines UC94-OBF/3 is available.

HYCO-2 WHEEL TURNS 4.7

For outboard engines up to 150 hp

HYCO package kit contains:

- UP20 F** Front mount helm pump.
- UC94-OBF** Front mount outboard cylinder
Specify engine type when ordering.
- OIL 15** Hydraulic oil - 2 quarts.
- TU95** 40 ft (12,2 m) 3/8" nylon tubing

The wheel is not included.

WARNING: Depending on the applications, the UC94-OBF is available in 2 versions: UC94-OBF/1 and UC94-OBF/3. UC94-OBF/1 cylinder is not suitable for HONDA® BF115 and BF130 engines and Mercury® Optimax™ 75, 90, 115. For these engines UC94-OBF/3 is available.

PROTECH WHEEL TURNS 4.29

PROTECH package kit contains:

- UP28 F** Front mount helm pump.
- UC128-OBF** Front mount outboard cylinder.
Specify engine type when ordering.
- PROTECH 1** - with UC128-OBF/1 cylinder
- PROTECH 2** - with UC128-OBF/2 cylinder
- PROTECH 3** - with UC128-OBF/3 cylinder
- OIL 15** Hydraulic oil - 2 quarts .
- KIT OB OPTIONAL** Hose kit with preassembled fittings.
Specify length required when ordering

The wheel is not included.

Durability and performance define the Protech front mount outboard steering package. From the stainless steel helm shaft, heavy duty shaft seals, carbon steel piston and 304 electropolished and passivated stainless link assemblies, the Protech is built for maximum longevity and peak performance. Adjustable boss style fittings allow precise hose routing without the risk of breaking the fittings by overtightening or leaking fittings from loosening during installation, a common problem on competing cylinders.

HYCO-1

HYCO-2

PROTECH

HIGH PERFORMANCE STEERING SYSTEMS

UP28 F-SVS – UP33 F-SVS – UP39 F-SVS

FRONT MOUNT HELM PUMPS

Specifically designed for high performance and high torque applications, the SilverSteer™ features a **1500 psi** helm and keyed bullhorns on the cylinder for maximum durability and minimal lost motion.

Whether a bass boat, flat boat or tournament style offshore fishing boat, the SilverSteer™ will deliver smooth, responsive and precise steering.

Adjustable boss style fittings allow precise hose routing without the risk of breaking the fittings by overtightening or leaking fittings from loosening during installation, a common problem on competing cylinders.

The SVS helms are always to be installed in conjunction with the UC128-SVS cylinders and the Kit OB-SVS hoses, which are also specifically designed for high torque applications.

The front mount version is a direct drop-in replacement for competing helms. Both the front mount and tilt helms feature stainless steel shafts and 90° adjustable nickel-plated brass fittings.

FEATURES

- Available in three different displacement sizes
- Compact design
- Ball bearing piston race
- Built-in lock valve for positive rudder lock
- **Integral relief valve for over-pressure protection 105 bar (1500 psi)**
- 3/4" tapered stainless steel shaft
- Easily accessible lock valve and shaft seal for replacement
- Cast iron rotor for greater durability and longer life
- **Complete with 90° adjustable fittings for 3/8" tube**

MODEL	P. No.	MOUNTING	DISPLACEMENT/ REVOLUTION	No. OF PISTONS	RELIEF VALVE SETTING	MAXIMUM WHEEL DIA.	WEIGHT
UP28 F-SVS	42476 R	Front mount	28 cc - 1.7 cu.in	5	105 bar - 1500 PSI	710 mm - 28"	5 kg - 11 lbs
UP33 F-SVS	42475 N	Front mount	33 cc - 2.0 cu.in	7	105 bar - 1500 PSI	710 mm - 28"	5 kg - 11 lbs
UP39 F-SVS	42474 L	Front mount	39 cc - 2.4 cu.in	7	105 bar - 1500 PSI	710 mm - 28"	5 kg - 11 lbs

FEATURES

- Available in three different displacement sizes
- Compact design
- Ball bearing piston race
- Built-in lock valve for positive rudder lock (patented)
- **Integral relief valve for over-pressure protection 105 bar (1500 psi)**
- Stainless steel shaft
- Easily accessible lock valve and shaft seal for replacement
- Cast iron rotor for greater durability and longer life
- Complete with 90° **adjustable** fittings for 3/8" tube
- Tilt mechanism for SilverSteer™ systems:
X70-SVS – 41880 T
- Tilt range of 48° and five locking positions

WARNING: X52 standard tilt mechanism cannot be used on SilverSteer™ high performance helm pumps

- **KIT-F** (optional) – 39664 Y Remote fill adapter

SILVERSTEER™

HIGH PERFORMANCE OUTBOARD STEERING SYSTEMS

UC128-SVS FRONT MOUNT CYLINDER

UC128-SVS – Balanced: the number of turns lock-to-lock is equal port to starboard or vice-versa

Adjustable boss style fittings for easy and leak free installation

High resistance stainless steel connection bolt (ULTRABOLT)

Specially designed for high performance, high torque applications the SilverSteer™ UC128 SVS cylinder is recommended for bass boats, flat boats and tournament fishing boats. Compatible with competing helms, hoses and oil, the UC128-SVS is built to last with heavy duty stainless steel cylinder rod, seals and link assemblies. Constructed of top grade materials this cylinder is simple to install and fits almost every 2 and 4 stroke outboard engine in the market. See the application guide next page to choose the appropriate cylinder (UC128-SVS/1, UC128-SVS/2 or UC128-SVS/3) for your application.

Depending on the applications on the outboard engines, the UC128-SVS is available in 3 versions:

UC128/1-SVS 41281U

UC128/2-SVS 41282W

UC128/3-SVS 41283Y

In the applications with dual UC128-SVS cylinder it is necessary to order a standard UC128-SVS cylinder (link arm attached to the starboard side of the cylinder) and a port UC128-SVS cylinder (link arm attached to the port side of the cylinder). See appropriate section for A90 tie bar required for use on dual engine/dual cylinder applications.

Depending on the applications on the outboard engines, the UC128P-SVS port cylinder is available in 2 versions:

UC128P-SVS

UC128P/1-SVS 41328U

UC128P/2-SVS 41329W

UC128-SVS, UC128P-SVS DIMENSIONS

SPECIFICATIONS	UC128/1 -/2 -/3 SVS
Volume	120 cc - 7.3 cu. in
Output force	450 kg - 992 lbs
Inside diameter	35 mm - 1.37"
Stroke	185 mm - 7.28"
3/8" (9.5mm) Fittings	For high pressure flex hose
Bleed fittings	DN5 Quick connect

SPLASHWELL DIMENSION REQUIREMENTS			
Engine No.	A	B	C
1	560 mm - 22.05"	152 mm - 5.98"	152 mm - 5.98"
2	1110 mm - 43.70"	152 mm - 5.98"	152 mm - 5.98"

For twin engine applications minimum engine center distance is 21.6" (550 mm)

UC128-SVS CYLINDER

ORDER GUIDE:

WARNING

The UC128-SVS front mount cylinder is not recommended for use in installations where the boat speed exceeds **69 mph (60 knots)**; (75 mph (65 knots) in dual engine, dual cylinder and counter rotating engines application). Not intended for use in racing applications.

SYSTEM	APPLICATION	WHEEL TURNS	COMPONENTS	MODEL	QTY
Single Engine Single Cylinder 	Up to 350 hp max	4.3 (UP28)	Cylinder	UC128-SVS	1
			Helm pump	UP28 or UP33-SVS	1
			Hose Kit	KIT OB-SVS	1
		3.6 (UP33)	Oil	OIL 15	2
			Steering wheel	(Wheel selection)	1

For a second station add:

1 UP28-SVS or UP33-SVS helm pump, 1 KIT OB-2S fitting kit, 1 KIT OB-SVS, 1 OIL 15, 1 steering wheel

Dual engine Single cylinder 	Up to 350 hp max (non-counter rotating engine)	4.3 (UP28)	Cylinder	UC128-SVS	1
			Helm pump	UP28 or UP33-SVS	1
			Hose Kit	KIT OB-SVS	1
	Up to 600 hp max (counter rotating engine)	3.6 (UP33)	Oil	OIL 15	2
			Tie bar	A94	1
			Steering wheel	(Wheel selection)	1

For a second station add:

1 UP28-SVS or UP33-SVS helm pump, 1 KIT OB-2S fitting kit, 1 KIT OB-SVS, 1 OIL 15, 1 steering wheel

Dual engine Dual cylinder 	Up to 600 hp max (non-counter rotating engines)	6.1 (UP39)	Cylinder	UC128-SVS	1
			Cylinder Port	UC128P-SVS	1
			Helm pump	UP39-SVS	1
			Hose Kit	KIT OB-SVS	1
	Up to 700 hp max (counter rotating engines)		Oil	OIL 15	3
			Tie bar	A90	1
			Steering wheel	(Wheel selection)	1
			Connection Kit	KIT OB-DBR-SVS	1

For a second station add:

1 UP39-SVS helm pump, 1 KIT OB-2S fitting kit, 1 KIT OB-SVS, 2 T fittings 39502 V, 1 OIL 15, 1 steering wheel

ATTENTION:

The SilverSteer™ helm pumps are always to be installed in conjunction with the UC128-SVS cylinder and the reinforced hose kit KIT OB-SVS.

NOTE:

Three outboard engine applications are available with UC128-SVS cylinder. For any further and detailed information, please contact our Technical Service.

For three or four outboard engines, dual cylinder applications, please refer to tie-bar section.

HIGH PERFORMANCE OUTBOARD STEERING SYSTEMS

KIT OB-SVS : HOSE KIT FOR SINGLE STATION INSTALLATION FOR SILVERSTEER™ SYSTEMS

Two high pressure flexible hoses with pre-crimped nickel plated brass fittings and bend restrictors on both ends. Recommended for use with all Uflex SilverSteer™ and MasterDrive™ helms with 1500 psi relief valves.

KIT OB-SVS

KIT OB-BHBR-SVS : HOSE KIT FOR SINGLE STATION INSTALLATION FOR SILVERSTEER™ SYSTEMS

Two high pressure flexible hoses with pre-crimped nickel plated brass fittings, bulkhead fittings and bend restrictors on both ends. Recommended for use with all Uflex SilverSteer™ and MasterDrive™ helms with 1500 psi relief valves.

SILVERSTEER™ WHEEL TURNS: 4.3

SilverSteer™ package kit contains:

UP28 F-SVS Front mount helm pump
UC128-SVS Front mount outboard cylinder.
Specify engine type when ordering.

Silversteer 1 - with UC128/1-SVS cylinder
Silversteer 2 - with UC128/2-SVS cylinder

OIL 15 Hydraulic oil 2 litres (0.5 gallons).
KIT OB-SVS Hose kit with preassembled fittings.
Specify length required when ordering.

The wheel is not included.

POWER ASSISTED OUTBOARD STEERING SYSTEM

Effortless steering for the most demanding applications! The MasterDrive™ power assisted outboard steering system delivers fingertip control regardless of speed or torque conditions.

MD

MasterDrive™ SYSTEM FEATURES

- Eliminates torque at the steering wheel
- Three different selectable levels of power give the boater the desired feeling on the wheel (PATENTED).
- Automatically reverts to manual mode in case of power loss.
- High efficiency, low Amp draw
- The system always running permits immediate control in any sea conditions
- Equipped with safety switch ON/OFF (SMART BUTTON)
- Can be used on dual station installations
- Suitable for use with autopilot
- Low noise
- Voltage: 12VDC
- CE marked in conformity with ABYC P21, ISO 10592 safety standards
- Ignition protected (SAE J-1171 and UNI EN 28846)

SYSTEM COMPONENTS:

- 1 single packaged **KIT MD** for single station containing:
 - 1 **UH**-front or tilt mount Master Helm
 - 1 **UPMD** Power Unit, 15' (4,5 m) wiring harness included
 - 1 **UCMD** User Interface
 - 4 **OIL 15** bottles of hydraulic oil
- 1 **KIT MD2** for dual station
- 1 **UC128-SVS** SilverSteer™ Steering Cylinder (1 UC128-SVS starboard+1 UC128/P-SVS port on dual cylinder applications)
- 1 **KIT OBMD**: high pressure hose kit, helm-power unit connection, complete with preassembled fittings.
- 1 **KIT OB-SVS**: SilverSteer™ high pressure hose kit complete with preassembled fittings.
- 1 **KIT OB-DBR-SVS**: SilverSteer™ high pressure hose kit complete with preassembled fittings for cylinder connection (dual cylinder applications only).
- 1 Tilt mechanism **X66-40613 M** suitable for Tilt Mount Helm. Tilt range of 48° and five locking positions.
- 1 Dual cylinder application Tie Bar: see selection
- 1 Steering Wheel: see selection
- 1 Instruction Manual

UH - HELM

- Available in two different displacement sizes: 32 cc (1.95 cu.in) and 40 cc (2.44 cu.in)
- Front Mount and Tilt Mount versions
- Dual station installation version also available (please refer to MD2 Kit)
- Built-in relief valve
- 3/4" tapered shaft
- Corrosion resistant painted body
- Waterproof
- Tilt Mount version is suitable for use with X66-40613 M tilt mechanism

MODEL	P. No.	MOUNTING	DISPLACEMENT/ REVOLUTION	APPLICATION	No. OF STATIONS	MAXIMUM WHEEL DIA.

TILT MECHANISM

- X66 - 40613 M
Tilt mechanism for MasterDrive™ tilt mount helms.
Tilt range of 48° and five locking positions

90° TWO FITTING KIT FOR MASTERDRIVE™ HELMS (OPTIONAL)

- MDF90 - 42821 F

X66

MDF-90

INTERMEDIATE HELM POSITION INSTALLATION KIT (OPTIONAL)

- **K81** - 42435 A
Kit to permit the MasterDrive™ helm installation at any intermediate dashboard position
- **K81MM** - 42498 B
Suitable version for Mercury® Verado™ power-assisted helm.

K81

new CE

K81MM

UPMD - POWER UNIT - 42096 E

- 12VDC Motor
- 45° swiveling fittings for easy installation
- Semitransparent 0,5 litre (0.11gal) tank gives immediate oil level vision
- Vented filler plug
- Suitable for applications with autopilot
- Bulkhead or floor mount
- Black galvanized motor case, salt water resistant
- 4,5 m (15') Wiring Harness included
- IP67 waterproof
- Ignition protected (SAE J-1171 and UNI EN 28846)

UCMD USER INTERFACE - 42097 G

- Safety switch ON/OFF (SMART BUTTON)
- Three different power levels with light indicator (PATENTED)
- Motor temperature visual indicator
- Twin engine key selection included
- Lighted panel for stand-by position
- Plug-in wiring harness
- Suitable for a second station installation
- 7 m (23 ft) panel extension cable also available - 42636 L

A94

TWIN OUTBOARD ENGINE/SINGLE

UC128-OBF or UC128-SVS CYLINDER TIE BAR

- Suitable for applications with single UC128-OBF (or UC128-SVS) front mount cylinder

NOTE: In the applications with dual cylinder use **A90** tie bar
- Allows to tilt the engines independently
- Stainless steel components
- Electropolished stainless steel ball joints
- Not recommended for applications exceeding 500 HP
- 5 different lengths available:

A94 x 26 – 42448 K - 26" (660,4 mm) twin engine centers

A94 x 28 – 42449 M - 28" (711,2 mm) twin engine centers

A94 x 30 – 42450 W - 30" (762,0 mm) twin engine centers

A94 x 32 – 42451 Y - 32" (812,8 mm) twin engine centers

A94 x 34 – 42452 A - 34" (863,6 mm) twin engine centers

ATTENTION: As the tiller arm position varies from engine to engine and the distance between two engines is not predictable, unexpected interferences may occur while tilting. A duly check of the tie bar installation is then strongly recommended. Should you need additional information, please do not hesitate to refer to our Technical Service.

A94 TIE BAR APPLICATIONS

UC128 + A94

A90**TWIN OUTBOARD ENGINE/TWIN****UC128-OBF or UC128-SVS CYLINDER TIE BAR**

Heavy duty twin engine/twin cylinder tie bar kit for use with UC128 and UC128P "Port" version outboard cylinders. Suitable for use with Protech and SilverSteer™ cylinders these AISI 304 electropolished and passivated stainless steel tie bars are simple to install and allow for independent trimming of engines with minimal effect on engine alignment.

- Suitable for applications with dual UC128-OBF (or UC128-SVS) front mount cylinder
NOTE: in applications with single cylinder use A94 tie bar
- Allows to tilt the engines independently
- Electropolished/passivated stainless steel components and ball joints
- Applicable to engine centers variable from 26" (660 mm) to 36" (914,4 mm).
- 6 different lengths available:
A90 x 26 - 42640 B - 26" (660,4 mm) twin engine centers
A90 x 28 - 42641 D - 28" (711,2 mm) twin engine centers
A90 x 30 - 42642 F - 30" (762,0 mm) twin engine centers
A90 x 32 - 42643 H - 32" (812,8 mm) twin engine centers
A90 x 34 - 42644 K - 34" (863,6 mm) twin engine centers
A90 x 36 - 42645 M - 36" (914,4 mm) twin engine centers

WARNING: In the applications with dual UC128-OBF (or UC128-SVS) cylinder it is necessary to order a standard UC128-OBF (or UC128-SVS) cylinder (link arm attached to the starboard side of the cylinder) and a UC128P-OBF (or UC128P-SVS) port cylinder (link arm attached to the port side of the cylinder).

UC128 starboard cylinders:

UC128-OBF/1 - 39423 Z
UC128-OBF/2 - 39966 R
UC128-OBF/3 - 39967 T
UC128/1-SVS - 41281 U
UC128/2-SVS - 41282 W
UC128/3-SVS - 41283 Y

UC128P port cylinders:

UC128P-OBF/1 - 40106 U
UC128P-OBF/2 - 40107 W
UC128P/1-SVS - 41328 U
UC128P/2-SVS - 41329 W

ATTENTION: As the tiller arm position varies from engine to engine and the distance between two engines is not predictable, unexpected interferences may occur while tilting. A duly check of the tie bar installation is then strongly recommended.

Should you need additional information, please do not hesitate to refer to our Technical Service.

A93

TRIPLE OUTBOARD ENGINE/TWIN UC128-OBF OR UC128-SVS CYLINDER TIE BAR

- Suitable for applications with triple outboard engines and dual cylinders UC128-OBF (or UC128-SVS)
- 4 different lengths available:
A93 x 26 - 42613 Y - 26" (660,4 mm) twin engine centers
A93 x 27 - 42637 N - 27" (685,8 mm) twin engine centers
A93 x 28 - 42638 R - 28" (711,2 mm) twin engine centers
A93 x 30 - 42639 T - 30" (762,0 mm) twin engine centers

Heavy duty triple engine/twin cylinder tie bar kit for use with UC128 and UC128P "Port" version outboard cylinders. Suitable for use with Protech and SilverSteer™ cylinders these AISI 304 electropolished and passivated stainless steel tie bars are simple to install and allow for independent trimming of engines with minimal effect on engine alignment.

ATTENTION: As the tiller arm position varies from engine to engine and the distance between two engines is not predictable, unexpected interferences may occur while tilting. A duly check of the tie bar installation is then strongly recommended. Should you need additional information, please do not hesitate to refer to our Technical Service.

HYDRAULIC TIE BAR

LTB1

Hydraulic Tie Bar for twin engine / twin cylinder applications where a mechanical tie bar is not feasible. Engine centers must be at least 38" wide as engine can periodically misalign. It connects using standard Kit OB or Kit OBBHBR hoses.

LTB1

STERNDRIVE CYLINDERS

APPLICATIONS

WARNING These recommendations should be used as general reference only and they apply to factory stock sterndrives only. In doubt, contact a qualified installation technician.

- Balanced cylinder** the number of turns lock to lock is equal port to starboard or vice-versa
- Unbalanced cylinder** the number of turns lock to lock is not equal port to starboard or vice-versa
- Clearance required at the engine tube side: 21.2" (540 mm).**
- ULTRAFLEX hydraulic cylinder** can be installed as an alternative to a mechanical steering system only.

NOTE: For applications with sterndrive engines not listed above, please contact our Technical Service.

ORDER GUIDE

SYSTEM A			Turn lock to lock: Balanced 4.7 - Unbalanced 4.7/5.8 Max rudder torque: 66 kgm - 5738 lbs. in
Components	Model	Qty	For an additional station add: 1 UP28 helm pump, 1 KIT OB-2S fitting kit, 1 KIT OB hose Kit, extra OIL 15, 1 steering wheel
Helm pump	UP28	1	
Cylinder	see application	1	
Hose Kit	KIT OB	1	
Oil	OIL 15	3	
Steering wheel	(Wheel selection)	1	
SYSTEM B			Turn lock to lock: Balanced 4 - Unbalanced 4/5 Max rudder torque: 66 kgm - 5738 lbs. in
Components	Model	Qty	For an additional station add: 1 UP33 helm pump, 1 KIT OB-2S fitting kit, 1 KIT OB hose Kit, extra OIL 15, 1 steering wheel
Helm pump	UP33	1	
Cylinder	see application	1	
Hose Kit	KIT OB	1	
Oil	OIL 15	3	
Steering wheel	(Wheel selection)	1	

NOTE: 3/8" diameter copper tubing can be used as an alternative tubing for plumbing the systems. For these applications a fitting kit – KIT 95 – is required.

KIT 95 - 39516 G:

3/8" copper tube fitting kit. It includes two 1.6 ft (0,5 m) nylon tubes and all necessary fittings for a single station.

KIT 95

BULKHEAD HOSE KITS

R7 - 3/4" BULKHEAD FITTING KIT

3/4" bulkhead fitting kit for single cylinder installation. 2 assemblies as illustrated per kit.
R7 - 40819 J

R7 KIT

R9 DIMENSIONS

ACCESSORIES

TU95:

3/8" nylon tubing. It is not recommended in the applications where the total tubing run exceeds 50 ft (15 m). Not recommended for use with UC128 and UC128-SVS cylinders.

KIT 95-2S - 39518 L:

Fitting kit for a second steering station or for an autopilot installation.

It includes all necessary fittings for 3/8" nylon or copper tube.

KIT 95-2S

ACCESSORIES

OIL 15 - 70704 K:

Hydraulic oil sold in 1 litre (0.26 gallons) bottle

- Hydraulic oil: ISO VG 15
- Viscosity: 15 cst a 40 °C
- Viscosity index: >150
- Solidification point: <- 30 °C
- Contamination according to NAS1638 ≤ 8

KIT F - 39664 Y:

Remote fill adapter for rear mount and tilt mount pumps.

OIL 15

KIT F

FITTINGS

61CA - 71013 L

3/8" (9,5 mm) nut and sleeve assembly, nickel plated

AF45 - 41284 A

BubbleBuster™

BubbleBuster™

A PORTABLE DEVICE FOR AUTOMATIC FILLING AND PURGING OF HYDRAULIC SYSTEMS

Reduce time and simplify purging hydraulic steering systems with the self contained and portable BubbleBuster™ purging unit.

Attach the hoses using the quick connect fittings to the helm and cylinder and with the push of a button the BubbleBuster™ begins cycling oil throughout the entire systems free of air.

The system features a ZeroEmulsion pump, 1 gal capacity reservoir and is compatible with competing helms and cylinders.

COMPONENTS INCLUDED

- One motor pump with safety valve , switch and 1 gal (5 litres) tank included, it allows the purging of 2 hydraulic steering systems before refilling. 12V electric motor with thermal protection; current absorption 8 A
- One 13' (4m) electric harness with alligator clips for fast connection with the battery.
- One double spiralled hose to connect to helm pump- extended length: 19.6' (6m)
- One double spiralled hose to connect to cylinder – extended length: 19.6' (6m)
- One utility tray

OPTIONAL COMPONENTS

- **KBE1:** No. 1 double spiralled hose to connect to cylinder 49' (15 m) extension
- **KBD2:** No. 1 kit for double cylinder systems filling and purge
- **KH94:** Connection kit for UC94-OBF cylinders with old bleeders (not fast connect)
- **KH128:** Connection kit for cylinders (except UC94) with old bleeders (not fast connect)

MODEL	P. No.	DESCRIPTION
BB	41666 R	BubbleBuster™ - complete set
KBE1	41682 N	Extension kit
KBD2	41703 U	Double cylinder purging kit
KH94	41899 R	UC94 (old) connection kit
KH128	41900 W	Connection kit for cylinders with old fittings (except UC94)

FRONT MOUNT HELM PUMPS

UP20 F

FEATURES

- Available in six different displacement sizes
- Compact design
- Ball bearing piston race
- Built-in lock valve for positive rudder lock
- Integral relief valve for over-pressure protection
- 3/4" tapered shaft. Stainless steel, except UP20
- Easily accessible lock valve and shaft seal for replacement
- Includes 90° **adjustable** fittings for 3/8" tube
- X56 - 40198 C square flange (for all models) or X57 - 39464 P (for all models except UP20) round flange permit to install the pumps in an intermediate dashboard position.

HOSES – ACCESSORIES - FITTINGS

KIT OB/M: HOSE KIT WITH PREASSEMBLED FITTINGS AT ONE END FOR SINGLE STATION INSTALLATION

Two high pressure flexible hoses with fittings featuring turning nuts preassembled at one end only. It is supplied with two spare fittings and two bend restrictors. Available in three standard lengths that can be cut to fit the required application.

KIT OB/M	LENGTH	P. No.
KIT OB/M-60	6,00 m - 19.7 ft	41708 E
KIT OB/M-90	9,00 m - 29.5 ft	41709 G
KIT OB/M-150	15,00 m - 49.2 ft	42565 P

TU5/16: 5/16" nylon tubing for OB-F5/16 fittings. Available per metre and 50 m (164 ft) coils.

OB-F5/16 - 40849U: reusable fitting featuring turning nut for use with 5/16" hydraulic hose and connection for 3/8" end fitting.

TUR7: high pressure hydraulic hose for FR7 12mm end fittings. Available per metre and 50 m (164 ft) coils.

RV70 - 42560 D: relief valve required for use in inboard applications with UP56 and UP68 pumps.

KIT OB-2S - 39539 V: fitting kit for a second steering station or for an autopilot installation. It includes all necessary fittings for 3/8" flexible hose and 8 m (ft 26.3) of 3/8" dia. nylon tube for the compensating line.

KIT 95 - 39516 G: 3/8" copper tube fitting kit. It includes one 1,0 m (3.2 ft) nylon tube and all necessary fittings for a single station application.

KIT 120-I - 42765 Y: 12 mm copper tube fitting kit – It includes one 1,0 m (3.2 ft) nylon tube and all necessary fittings for a single station application

MD - packaged kit for single station

MD2 - Packaged kit for dual station

MasterDrive™ SYSTEM FEATURES

- Eliminates torque at the steering wheel
- Three different selectable levels of power give the boater the desired feeling on the wheel (PATENTED).
- Automatically reverts to manual mode in case of power loss.
- High efficiency, low Amp draw
- The system always running permits immediate control in any sea conditions
- Equipped with safety switch ON/OFF (SMART BUTTON)
- Can be used on dual station installations
- Suitable for use with autopilot
- Low noise
- Voltage: 12VDC
- CE marked in conformity with ABYC P21, ISO 10592 safety standards
- Ignition protected (SAE J-1171 and UNI EN 28846)

SYSTEM COMPONENTS:

- 1 single packaged **KIT MD** containing:
 - 1 UH-front or tilt mount Master Helm
 - 1 UPMD Power Unit, 15' (4,5 m) wiring harness included
 - 1 UCMD User Interface
 - 4 OIL 15 bottles of hydraulic oil
- 1 inboard cylinder (suggested model: see following page "order guide")
- 1 **KIT MD2**: for dual station
- Flexible hydraulic hoses
- 1 Tilt mechanism **X66-40613 M** suitable for Tilt Mount Helm. Tilt range of 48° and five locking positions.
- 1 Dual cylinder application Tie Bar: see selection
- 1 Steering Wheel: see selection
- 1 Instruction manual

NOTE

The MasterDrive™ helms (both the UH Master and the UHD slave for a dual station), the UPMD Power Unit and the UCMD User Interface are the same products shown on the outboard MasterDrive™ system.
For more details please refer to the outboard MasterDrive™ section.

All ULTRAFLEX steering wheels meet the EEC directive 94/25 requirements about pleasure boats. All steering wheels are CE marked in conformity with the EN 28848 – EN 29775 and ABYC P22 safety standards

PADDLE TRIM

For complete control of engine trim and tilt, trim tabs, jackplates, PowerPole(R) and other on board systems, the innovative Paddle Trim system is the answer.

Adaptable to existing front mount hydraulic and tilt helms, the Paddle Trim is ergonomically designed to allow the driver to make precise adjustments to the attitude of the boat or other systems without removing his hand from the steering wheel.

123

Single or dual

Adjustable positioning

Tilt or front mount

FEATURES

- Available both in single and dual versions (for either two equal or two different outputs).
- Both single or dual paddle can be positioned at various angles for the most comfortable choice.
- Equipped with one water proof "MOM.ON-OFF-MOM.ON switch (2 switches on dual version).
- Max load 5 Amp @ 12VDC.
- For loads exceeding 5 Amp we recommend the use of the **KTR - 42860S** kit relay.
- Uflex® trim tabs require the use of the **KTR - 42860S** kit relay.
- Suitable for any kind of steering wheel dish. Max wheel dia. 400 mm (15.7").
- Easy to install on the following Ultraflex® steering systems:
 - front and tilt mount hydraulic helms
 - tilt mount mechanical helms
- Wiring harness, labels and mounting hardware kit are included. The mounting plate, which differs between front and tilt mount installation, is ordered separately.

SINGLE LEVER SIDE MOUNT CONTROLS

Featuring AISI 316 stainless steel lever and bezel, the B400 has a sleek and modern design which is ideal for sailboats.

The B400 has universal control mechanism that allows for both "push" or "pull" for throttle and shift, push button warm up, and will accept 33C style cables, as well as BRP®, Mercury® Gen I and Gen II cables with optional adapters.

Available in mechanical version or hybrid version (patented) to control the shift by a mechanical cable and the throttle via 0-5V electric signal.

FEATURES

- 316 stainless steel lever and flange for a better resistance in the marine environment
- Enables easy and safe shifting by preventing accidental gear engagement unless engine is idling
- Can be installed horizontally or vertically, on the starboard or port side of the boat
- Provided with a brake tension release system easily adjustable
- Push-in button for throttle operation in Neutral (ENGINE WARM UP).
- Neutral safety switch **X41** - 38130 F included prevents in-gear starting
- Exceeds EN ISO 11547 standards when **X41** safety switch is installed
- The B400 ETC (Electronic Throttle Control) version is available on request. The sensor has an analog output signal which can be single or redundant. The output voltage range is chosen by the customer between 0 and 5V. Power supply 5V +/- 10%, linearity +/- 1%.
For ETC controls please contact our Technical Service for custom configuration.
- For use with Ultraflex C2, C8, MACHZero control cables (no kit required)

MODELS

B400 - 42076 Y Fully mechanical version

B400 - B401-ETC

SINGLE LEVER SIDE MOUNT CONTROLS

The new B310 controls combine elegance, functionality and versatility.

Available with chrome, burl or soft touch control levers, the B310 series can be used on outboards, sterndrives and inboard applications.

The universal control design allows for the connection of 33C Universal style cable and OMC (Johnson/Evinrude) cables with adapters included. Mercury Gen I cables can be easily connected with the addition of the K35 connection kit.

FEATURES

- Enables easy and safe shifting by preventing accidental gear engagement unless engine is idling
- Can be installed horizontally or vertically, on the starboard or port side of the boat
- Provided with a brake tension release system adjustable from outside
- Pull-out handle disengages shift for warm-up
- Includes **X50** neutral safety switch which prevents in-gear starting
- Exceeds EN ISO 11547 standards when X50 safety switch is installed
- All models are provided with positive lock-in neutral to prevent accidental gear engagement
- All models are provided with a power trim switch conveniently located in the handle grip that enables an easy tilting of the engine
- For use with:
 - All Ultraflex control cables except C4, C36 and MACH36
 - Mercury® current BRP® (OMC®) \ Yamaha® \ Suzuki® Honda® \ Volvo® style cables
 - 33C style cables
- Ultraflex C5, C16, MACH5 and Mercury® cables require **K35** - 34730 U connection kit
- Ultraflex C22 and C23 cables require **KB1** - 39964 L connection kit

MODELS

B310CH - 41789 H - Provided with a positive lock-in neutral and trim switch

B310BR - 41788 F - Provided with a positive lock-in neutral and trim switch

B310B-NT - 42628 M - Provided with a positive lock-in neutral and without trim switch

SINGLE LEVER SIDE MOUNT CONTROLS

Single lever / dual action control to operate both throttle and shift.
Suitable for any type of boats with outboard, inboard or I/O power plants.

FEATURES

- Enables easy and safe shifting by preventing accidental gear engagement unless engine is idling
- Can be installed horizontally or vertically, on the starboard or port side of the boat
- Provided with a brake tension release system adjustable from outside
- Pull-out handle disengages shift for warm-up
- Includes **X12** neutral safety switch which prevents in-gear starting
- Exceeds EN ISO 11547 standards when X12 safety switch is installed
- All models are provided with positive lock-in neutral to prevent accidental gear engagement
- B184 and B184CB models are provided with a power trim switch conveniently located in the handle grip that enables an easy tilting of the engine
- For use with:
 - All Ultraflex control cables except C4, C36 and MACH36
 - Mercury® \ current BRP® (OMC®) \ Yamaha® \ Suzuki® Honda® \ Volvo® style cables
 - 33C style cables
- Ultraflex C5, C16, MACH5 and Mercury® cables require **K35** - 34730 U connection kit
- Ultraflex C22 and C23 cables require **KB1** - 39964 L connection kit

SINGLE LEVER SIDE MOUNT CONTROLS

Single lever / dual action control to operate both throttle and shift.
Suitable for any type of boats with outboard, inboard or I/O power plants.

FEATURES

- Enables easy and safe shifting by preventing accidental gear engagement unless engine is idling
- Can be installed horizontally or vertically, on the starboard or port side of the boat
- Made of painted marine aluminum
- Pull-out handle disengages shift for warm-up
- Includes **X12** neutral safety switch which prevents in-gear starting
- Exceeds EN ISO 11547 standards when X12 safety switch is installed
- Provided with a positive lock-in neutral to prevent accidental gear engagement
- For use with:
 - All Ultraflex control cables except C22, C4, C36 and MACH36
 - Mercury® \ current BRP® (OMC®) \ Yamaha® \ Suzuki® Honda® \ Volvo® style cables
 - 33C style cables
- Ultraflex C5, C16, MACH5 and Mercury® cables require **K35** - 34730 U connection kit.
- To connect C14 and MACH14 cables and current BRP® (OMC®) cable to engine, use **K51** - 32526 N connection kit.

"LOW PROFILE" SINGLE LEVER TOP MOUNT CONTROLS

Combining traditional styling with a low profile design, the B301 and B302 controls provide the look and feel of electronic controls without the cost. With a focus on efficiency these controls have been specifically designed to improve the functionality of older control systems, making the boat easier to control.

When coupled with the Mach series control cables with industry leading efficiency, this series of controls will provide nearly fingertip control of the control system.

Single lever / dual action control to operate both with throttle and shift.
Suitable for any type of boats with outboard, inboard or I/O power plants.

FEATURES

- Compact single lever controls offering a unique low profile style compared to other controls available on the market
- Enables easy and safe shifting by preventing accidental gear engagement unless engine is idling
- Made of marine aluminum, chrome plated or powder coat finish
- Push in button disengages shift for warm-up
- Includes **X12** neutral safety switch which prevents in-gear starting
- Exceeds EN ISO 11547 standards when X12 safety switch is installed
- For use with all Ultraflex control cables except C4:
 - C14 and MACH14 cables require no kit
 - for C2, C8 and MACHZero cables the connection kit **K59** - 40144 C is included
 - C5, C16 and MACH5 cables require **K60** Kit - 40145 E
 - C36 and MACH36 cables require **K62** Kit - 40157 J
 - C22 cable requires **K61** Kit - 40146 G

TWO LEVER TOP MOUNT CONTROLS

134

Two lever / single action control: each lever operates separately either the throttle or shift. Suitable for use with outboard, inboard or I/O power plants.

FEATURES

- Flush mount suitable for exposed positions such as flying bridge
- Made of marine aluminium with chrome plated lever
- Adjustable brake to avoid throttle creep and positive detent for shift. Both can be adjusted from the outside
- Neutral safety switch **X12** - 34543 Q included prevents in-gear starting
- Available with straight or bent levers
- B58 and B59 models are provided with an interlock kit to prevent accidental gear engagement
- Exceeds EN ISO 11547 standards when X12 safety switch is installed
- For use with Ultraflex C2, C8, MACHZero and all 33C style engine control cables.
- Ultraflex C22 and all 43C style cables require **K22** - 34713 Q connection kit.
- Burl wood cover **optional**:
X51 - 38985 P

TWO LEVER TOP MOUNT CONTROLS HYBRID OR MECHANICAL VERSIONS

Two lever / single action control: each lever operates separately either the throttle or shift. Suitable for use with outboard, inboard or I/O power plants.

FEATURES

- Flush mount suitable for exposed positions such as flying bridge
- On **hybrid versions**, especially suitable for jet boats, throttle or shift, or throttle and shift control is provided by a 0-5V voltage signal. The sensor has an analog output signal which can be single or redundant. For the hybrid controls, please contact our Technical Service for custom configuration.
- Levers structure made of die cast zinc alloy provided with a soft thermoplastic ergonomical handgrip
- Adjustable brake to avoid throttle creep and positive detent for shift
- Provided with an interlock kit to prevent accidental gear engagement
- Adjustable ratchet for precise throttle operation obtained applying to the gas lever the optional kit **K52** - 37382 B
- Neutral safety switch **X12** - 34543 Q included prevents in-gear starting
- Raked throttle handle and straight gear handle for a better manoeuvring
- Supplied for right hand installation. Left hand installation available on request
- Exceeds EN ISO 11547 standards when X12 safety switch is installed
- For use with Ultraflex C2, C8, MACHZero and all 33C style engine control cables. Ultraflex C22 and all 43C style cables require **K22** - 34713 Q connection kit.
- Burl wood cover **optional**: **X51** - 38985 P

TWO LEVER TOP MOUNT CONTROLS

136

Two lever / single action control: each lever operates separately either the throttle or the shift.

Suitable for use with outboard, inboard or I/O power plants.

FEATURES

- Made of aluminium, chrome plated or black powder coat finish
- Throttle lever is provided with adjustable brake tension release system and shift lever with forward, reverse and neutral detents.
- Includes **X12** neutral safety switch which prevents in-gear starting
- In dual station applications the **L23-31649 B** selector unit has to be used (page 110)
- Exceeds EN ISO 11547 standards when X12 safety switch is installed
- Use with all Ultraflex control cables except C4:
 - C14 and MACH14 cables require no kit
 - For C2, C8 and MACHZero cables the connection kit **K67** - 40705 T is included
 - C5, C16 and MACH5 cables require **K63** kit - 40757 N
 - C22 cable requires **K64** kit - 40758 R

HOW TO MEASURE FOR CONTROL CABLE INSTALLATION

FOR NEW INSTALLATION, measure A + B distance from the control along an unobstructed cable routing to clutch and / or throttle connection. Round this dimension off to the next whole foot: you will have your cable length. We recommend that the cable bends have a minimum radius of about 8" (200 mm). For outboard engine installations, it is necessary to add three feet to the obtained length, in order to allow the engine movement.

To determine the needed length of the REPLACEMENT CABLE, measure it from tip to tip. When ordering, specify the cable length in feet, rounding the dimension off to the next whole value. If any kit is required to complete the cable connection, consult the appropriate section in this catalog.

OUTBOARD

A + B + 3' (90 cm) = L

MACH™ SERIES

HIGH EFFICIENCY

AND FLEXIBILITY

ENGINE CONTROL CABLES

For the ultimate in efficiency and response, the Mach Series cables deliver unmatched results. They have been specifically designed to make even the most complex of cable installations result in smooth, easy and precise shift and throttle movement. Using a patented stranded wire core with lubricated extrusion, the Mach cables are an ideal solution for applications with long cable runs, tight bends, or where easy and precise throttle response is required. Mach Series cables also feature solid stainless steel output fittings and are available in 33C, Mercury® Gen I, Mercury® Gen II and BRP® styles.

- The “high performance” **MACH™** Cables are the result of our decades of experience in producing high quality, long lasting, flexible cables. The innovative core design maximizes efficiency and minimizes lost motion, while the exclusive design of the conduit provides extremely high level of flexibility.

FEATURES AND PERFORMANCE

- Available in the following configurations:
 - **MACHZero** - Universal style (like C2, C8)
 - **MACH5** - Mercury® style (like C5)
 - **MACH14** - Current BRP® (OMC®) style (like C14)
 - **MACH36** - Gen II Mercury® style (like C36)
- Suitable for outboard – inboard and sterndrive engines
- High efficiency for smooth operation
- High flexibility for reduced bend radius. Ideal for long complex cable routings
- Maintenance free
- Stainless steel cables end fittings
- High resistance blue outer jacket against abrasion, UV and chemicals

CONTROL CABLES FOR JET ENGINES

C40 Stroke: 86 mm (3.4")
Throttle Cable for Weber® jet engines

C48 Stroke: 84 mm (3.3")
Shift and throttle cable for jet boats 40 Class. Suitable for Teleflex® controls. With B83 - 42836V connection kit is suitable for use with Ultraflex B310, B183, B184 controls.

C40

C48

C40

C48

ENGINE CONTROL CABLES

- C2** Stroke: 3.4" (87 mm)
For use with inboard, sterndrive and outboard engines with appropriate accessories.
- C8** Stroke: 3.4" (87 mm)
For use with inboard, sterndrive and outboard engines, with appropriate accessories.
- MACHZero** Stroke: 3.4" (87 mm).
For use with inboard, sterndrive and outboard engines.
Ideal for high performance applications, long cable runs and complex routings. Blue color jacket.
- C4** Stroke: 3.1" (80 mm)
For BRP® - Evinrude® (OMC®) engines manufactured before 1979.
- C14** Stroke: 3" (75 mm)
For BRP® - Evinrude® (OMC®) engines manufactured from 1979 to date.
- MACH14** Stroke: 3" (75 mm).
For BRP® - Evinrude® (OMC®) engines manufactured from 1979 to date.
Blue color jacket.
High performance applications.
- C36** Stroke: 3.3" (85 mm)
For Mercury® and Mercruiser® engines and Mercury® Generation II™ series controls.
- MACH36** Stroke: 3.4" (85 mm).
For Mercury® and Mercruiser® engines and Mercury® Generation II™ series controls.
Blue color jacket.
High performance applications.
- C5** Stroke: 3.75" (95 mm)
For Mercury® and Mercruiser® engines.
- MACH5** Stroke: 3.75" (95 mm).
For Mercury® and Mercruiser® engines.
Blue color jacket.
High performance applications.
- C16** Stroke: 3.1" (80 mm).
For Mariner® engines up to 40 hp.
- C25** Stroke: 3.1" (80 mm)
For Volvo® engines using BRP® (OMC®) top mount controls.
- C22** Stroke: 3.1" (80 mm)
Stainless steel clamp fittings.
Recommended for heavy duty applications.
- C23BC** Stroke: 3.1" (80 mm)
Bulkhead mount 4300 type cable
Stainless steel clamp fitting and bulkhead fitting recommended for heavy duty applications.
- B14** Stroke: 2.8" (70 mm)
Designed for throttle, fuel shut-off and other applications. Supplied with L13 and L14 clamp and shim.
- C40** Stroke: 86 mm (3.4")
Throttle cable for Weber® engines
- C48** Stroke: 84 mm (3.3")
Shift and throttle cable for jet boats 40 Class

Part number for ordering:
Example: C2 XLL - LL = Length

UNIVERSAL 3300 STYLE CABLES

UNIVERSAL 4300 STYLE CABLES

ENGINE STOP CABLE

ACCESSORIES FOR ENGINE CONTROL CABLES

L2 - 30324 D: Cable clamp block

L3 - 30325 E: Shim and clamp block.

Fits C2, C8, MACHZero and all 33C style cables.

L7 - 38078 U: Ball joint 10-32 UNF.

Stainless steel, fits C2, C8, MACHZero and all 33C style cables.

L12 - 30334 F: Cable end fitting.

Fits C2, C8, MACHZero and all 33C style cables.

L13 - 30335 G: Stop collar. Fits C4 and B14 cables.

L14 - 30336 H: Cable clamp block.

Fits C2, C8, MACHZero and all 33C style cables.

L25 - 31906 D: Clevis 10-32 UNF.

Fits C2, C8, MACHZero and all 33C style cables.

L26 - 33517 N: Clevis 1/4" x 28 threaded. Fits C22 and 4300 series cables.

K56 - 39237 C

Adapts C2, C8, MACHZero and all 33C style cables for use with Mercury® engines.

K57 - 39238 E

Adapts C2, C8, MACHZero and all 33C style cables for use with BRP® - Evinrude® engines.

UIFLEX®

ELECTROMECHANICAL TRIM TABS

UFLEX ELECTROMECHANICAL TRIM TAB SYSTEMS

Improve fuel economy and passenger comfort with Uflex electromechanical trim tabs. Featuring electropolished stainless steel planes and low consumption, high speed, composite actuators, these tabs are built to last in the most demanding sea conditions.

Uflex trim tabs have been specifically designed for easy installation using a quick connect bracket-actuator, requiring only one small hole per tab through the transom. The patented transom mounting bracket encapsulates the wiring to ensure protection against any wiring damage.

FEATURES

- Operating system with hardened steel ballscrew, suitable to withstand high push loads.
- Prompt and easy control with the innovative use of a **Joystick (PATENTED)**
- **AUTO-LINEUP**: automatic flap re-alignment function
- Completely sealed thermoplastic resin tab actuators: maximum protection guaranteed by dual seals and a rubber bellow (PATENTED)
- Snap-in system (PATENTED) with protected harness for an easy installation
- Stainless steel rod and tabs
- The innovative profile of the tabs increases the efficiency of the system
- The top surface of the stainless steel tabs is mirror polished to give higher resistance to marine environment.
Non polished stainless steel tabs also available.
- Hole hinge design (PATENTED) allows for precise retrofit replacement with Lenco® and Bennett® same size tabs
- Fully maintenance free
- Voltage: 12V DC
- Actuator total length (full closed): 11.8" (301 mm)
- Stroke: 2.25" (57 mm)
- Waterproof: IP68 protection
- CE Certification
- Meets with the EN 60945 standards
- The system is not intended for use in racing applications

STANDARD COMPONENTS
(SINGLE ACTUATOR PER TAB)

- 1 pair of electromechanical black actuator complete with connection brackets and 1 m (3.28') wiring harness.
- 1 Joystick control unit with 0.50 m (1.64') wiring harness
- 1 pair of stainless steel tabs. Tabs are sold separately: specify selected model when ordering

OPTIONAL COMPONENTS

- 1 extension wiring harness kit for the power cable and the actuator cables. Deutsch plugs included
- 1 second station Joystick-2 control unit with 0.50 m (1.64') wiring harness
- 1 zinc alloy sacrificial anode kit to neutralize the galvanic currents on tabs (2 anode kits for every 1 pair tab installation)
- 1 6,0 m (19,7 ft) or 9,0 m (29,5 ft) extension wiring harness for the second station. Deutsch plugs included.
- 1 2,0 m (6,6 ft) extension wiring harness for auto-line up. Deutsch plugs included.

STANDARD INSTALLATION

INSTALLATION WITH
BENNETT® RETROFIT BRACKET

STANDARD	BENNETT® RETROFIT
A: 228.6 mm - 9"	A: 304.8 mm - 12"
B: 19.5 mm - 0.77"	B: 21 mm - 0.83"

APPLICATIONS

BOAT LENGTH	BOAT LENGTH (m)	TAB SIZE (length x width)	TAB SIZE (cm)
14' - 18'	4,5 - 5,5	9" x 9"	22,8 x 22,8
16' - 25'	5,0 - 8,0	9" x 12"	22,8 x 30,5
18' - 30'	5,5 - 9,0	12" x 12"	30,5 x 30,5
26' - 36'	8,0 - 11,0	12" x 18"	30,5 x 45,7

These recommendations should be used as a general reference only. Final selection should be made with the assistance of a qualified installation technician. For any further information please contact our Technical Service

ACTUATORS

AB12 - 41839 W

12 VDC Black actuator and brackets
1 m (3.28') wiring harness with Deutsch crimped pins included

AB12

Full closed actuator

Full stroke

CONTROL UNIT

JOYSTICK/S CONTROL 41849 Z

JOYSTICK/B CONTROL 42855 Z

Main station compact control unit with joystick (PATENTED) **Auto line -up** function included (automatic flap re-alignment) 0.50 m (1.64') wiring harness included

- 70 mm (2.76") hole size

JOYSTICK/S CONTROL

JOYSTICK/S-2 CONTROL 42306 N

JOYSTICK/B-2 CONTROL 42856 B

Second station control unit with joystick; 0.50 m (1.64') wiring harness included

JOYSTICK - Dimensions

HIGH PERFORMANCE POLISHED TABS

Stainless steel, mirror electro-polished trim tab blades. No need for new holes in case of Lenco® or Bennet® same size replacement. They are not designed for use in racing applications.

MODEL	PART No.	DESCRIPTION	WEIGHT PER PAIR KG (LBS)
P99	41844 N	Stainless steel tab pair 9"x9"	2,8 kg (6.2 lbs)
P912	41845 R	Stainless steel tab pair 9"x12"	3,6 kg (7.9 lbs)
P1212	41846 T	Stainless steel tab pair 12"x12"	4,6 kg (10.1 lbs)
P1218	41847 V	Stainless steel tab pair 12"x18"	6,7 kg (14.8 lbs)

Mirror polished stainless steel tabs

STAINLESS STEEL NON POLISHED TABS

Stainless steel trim tab blades. No need for new holes in case of Lenco® or Bennet® same size replacement. They are not designed for use in racing applications.

MODEL	PART No.	DESCRIPTION	WEIGHT PER PAIR KG (LBS)
NP99	42650 E	Stainless steel tab pair 9"x9"	3,3 kg (7.3 lbs)
NP912	42653 L	Stainless steel tab pair 9"x12"	4,0 kg (8.8 lbs)
NP1212	42651 G	Stainless steel tab pair 12"x12"	5,0 kg (11.0 lbs)
NP1218	42652 J	Stainless steel tab pair 12"x18"	7,4 kg (16.3 lbs)

Non polished stainless steel tabs

OPTIONAL COMPONENTS

EXTENSION WIRING HARNESS KITS

KE20 - 42378 R - Extension Wiring Harness
Kit includes one 5,0 m (16.4') length wiring harness extension for the power cable and two 6,0 m (19.7') length wiring harness extensions for the actuator cables. Deutsch plugs included

KE30 - 42379 T - Extension Wiring Harness
Kit includes one 5,0 m (16.4') length wiring harness extension for the power cable and two 9,0 m (29.5') length wiring harness extensions for the actuator cables. Deutsch plugs included

KEJ2-20 - 41835 P
6 m (19,7 ft) extension wiring harness for a second station. Deutsch connectors included.

KEJ2-30 - 42375 J
9 m (29,5 ft) extension wiring harness for a second station. Deutsch connectors included.

KEK-7 - 42376 L
2 m (6,6 ft) auto-line up extension wiring harness key frame. Deutsch connectors included.

KENS-7 - 42377 N
2 m (6,6 ft) auto-line up extension wiring harness neutral safety. Deutsch connectors included.

ANODE KITS

Zinc alloy anode kit neutralizes the galvanic currents endangering the trim tabs. 2 anode kits are necessary for every 1 pair tab installation.

KA70 - 42441 V
Ø 2.8" (70 mm) sacrificial anode kit for tab up to 12" x 12" size.

KA90 - 42442 X
Ø 3.5" (90 mm) sacrificial anode kit for tab 12" x 18" size

WES[®]

ULTRAFLEX CONTROL SYSTEMS S.r.l.

HATCH LIFTERS

AV SERIES ELECTRICAL HATCH LIFTERS

Constructed of anodized aluminum and stainless steel, the Uflex hatch lifters are built to last. Lifting with up to 265 Lbs of force, these actuators are an ideal solution for controlling engine hatches, lazarets, doors and other on board fixtures.

A unique sleeve on the AV "Non Locking" version of these actuators allows you to manually open the hatch in the event of power loss i.e. weak batteries. For high performance applications where the hatch could blow open, we recommend the AVL series which pushes as well as pulls with 265 Lbs.

All mounting hardware is included.

TECHNICAL FEATURES

- According to the load required, the AV hatch lifter can be mounted individually, or in twin cylinder installation for heavier loads. It is also possible to install more than two AV actuators in multiple applications.
- **Maximum load for single installations: 1200N (120 kg - 265 lbs)**
- **Maximum load for dual installations: 2400N (240 kg - 529 lbs)**
- Maximum load is recommended not to be exceeded.
- Supplied with all mounting hardware.
- Stainless steel telescopic ram for manual operation in case of emergency.
- Locking version (AV-L) recommended for high performance applications.
- Circuit breaker to stop accidental overloading of the system and electronic stop at closed or full open position.
- IP 65 protection rated
- Speed: 25mm/sec no load applied, 17 mm/sec maximum load
- Current absorption in single installations: 10A at 12V, 5A at 24V
- Current absorption in dual installations: 20A at 12V, 10A at 24V
- AV 12VDC models are Ignition Protected. UL1500 - ISO8846 approved.

SPARE FIXING BRACKET:
BR/AV - 80382 I

AV SERIES - SINGLE ACTION

MODEL	PART No.	VOLTS	STROKE	LENGTH A (FULL CLOSED ACTUATOR)	EXTERNAL DIA.
AV 3012	40671 C	12 V DC	12" - 300 mm	27" - 677 mm	1,9" - 48 mm
AV 4512	40582 D	12 V DC	18" - 450 mm	33" - 827 mm	1,9" - 48 mm
AV 6012	40584 H	12 V DC	24" - 600 mm	39" - 977 mm	1,9" - 48 mm

AV-L SERIES - LOCKING - DUAL ACTION

MODEL	PART No.	VOLTS	STROKE	LENGTH A (FULL CLOSED ACTUATOR)	EXTERNAL DIA.
AV-L 3012	40703 P	12 V DC	12" - 300 mm	27" - 677 mm	1,9" - 48 mm
AV-L 4512	40590 D	12 V DC	18" - 450 mm	33" - 827 mm	1,9" - 48 mm
AV-L 6012	40592 G	12 V DC	24" - 600 mm	39" - 977 mm	1,9" - 48 mm

WARNING: The AV Series hatch lifters can be opened freely in the event of a power failure, and can therefore open while underway. The AV Series hatch lifters are not intended for use on high performance boats or in applications where the hatch may open unintentionally. For these applications we recommend the AV-L series hatch lifters, which stay locked when the actuator is in the closed position.

ULYSSES SERIES **ELECTRICAL** **LINEAR ACTUATORS**

TECHNICAL FEATURES

- **Single installation only**
- **Pull and push maximum load: 650N (65 kg - 144 lbs)**
- Pull and push maximum load is recommended not to be exceeded.
- Supplied with all mounting hardware.
- Aluminium ram.
- Circuit breaker to stop accidental overloading of the system and electronic stop at closed or full open position.
- IP 65 protection rated
- Speed: 5 mm/sec no load applied, 4 mm/sec maximum load
- Current absorption: 2A

Highest installation flexibility: 180° oscillation range

MODEL	PART No.	VOLTS	STROKE	LENGTH A (FULL CLOSED ACTUATOR)	EXTERNAL DIA.
ULYSSES 1812	40924 Q	12V DC	7" - 180 mm	19.2" - 488 mm	1.3" - 34 mm
ULYSSES 3012	40925 R	12V DC	12" - 300 mm	23.9" - 608 mm	1.3" - 34 mm

**SPARE FIXING BRACKET:
BR/UL - 35697 P**

Fig. 1

COMPONENTS DESCRIPTION

AV Series Hatch Lifters

- n° 1 AV actuator for single installation (Fig.1)
- n° 2 AV actuators for dual installation (Fig.2)
- External diameter: 1.9" (48 mm)
- Length at closed position: 14.8" (377 mm)+ stroke
- Maximum oscillation range: 125°

ULYSSES Series actuators

- n° 1 Ulysses actuator (Fig.1)
no dual installation
- External diameter: 1.3" (34 mm)
- Length at closed position: 12.1" (308 mm)+ stroke
- Maximum oscillation range: 180°

Power supply cable:

- **AV** and **ULYSSES** actuators are supplied with 5 ft (1,5 m) of electrical cable
- Warning: in case of longer cable length required, do not substitute the existing harness, but make a junction following the instructions supplied with the product.

Two way push-button with central off position not supplied

Fuse (not supplied)

Battery (not supplied)

Fig. 3

Fig. 2

INSTALLATION

- The following equation will help you to calculate the maximum strength (Fmax) required from the hatch lifter to open your hatch, knowing the dimensions and weight of the hatch and the position of the mounting brackets.

$$F_{max} = \frac{P}{2} \times \frac{d}{b} \times \frac{L}{a}$$

P = weight of the hatch in Newton

c, a, b = dimensions in metres indicated in Fig. 3 and Fig. 4

L = hatch lifter length when in closed position

Maximum load (Fmax):

• AV Series actuators:

1200 N (120 kg - 265 lbs) single installation, pushing only

2400 N (240 kg - 530 lbs) dual installation pushing only

Note: when the load exceeds 2400 N (240 kg - 530 lbs), it is possible to install more than two AV actuators

• ULYSSES actuators:

650 N (65 kg - 144 lbs) single installation only, both pull and push
